# 1 Dublin City North Dashboard

This overview provides a snapshot of key socio-demographic characteristics of the Dublin City North CYPSC Area.

Dublin City North CYPSC Area is comprised of 93 Electoral Divisions (EDs). Ballymun/Whitehall Child and Family Support Network (CFSN) Area is comprised of nine EDs. Finglas CFSN Area is comprised of thirteen EDs. Cabra CFSN Area is comprised of ten EDs. North East Inner City CFSN Area is comprised of twelve EDs. North West Inner City CFSN Area is comprised of six EDs. Dublin City Bay CFSN Area is comprised of eighteen EDs and Dublin North East CFSN Area is comprised of twenty-five EDs

## 1.1 Demographics

State Population Aged 0-24 by Age Band 2016

Dublin City North Population Aged 0-24 by Age Band 2016

	Total Age 0-4	Total Age 5-9	Total Age 10-14	Total Age 15-19	Total Age 20-24	Total Age 0-24
DCN	18,769	17,571	15,660	18,083	25,596	95,679
DCN Percentage	20%	18%	16%	19%	27%	100%
State	331,515	355,561	319,476	302,816	273,636	1,583,004
State Percentage	21%	22%	20%	19%	17%	100%

The Dublin City North CYPSC Area had 10 percentage points more of its population in the age range 0-24 that were aged 20-24 than was the case in the State. Conversely, it had a relatively lower proportion of its population aged 5-9.

## Population Density

The Dublin City North CYPSC Area contained the three most densely populated EDs in the State in 2016.

It is anticipated that the population of Dublin City will grow at a rate of 0.9% per annum until 2031.

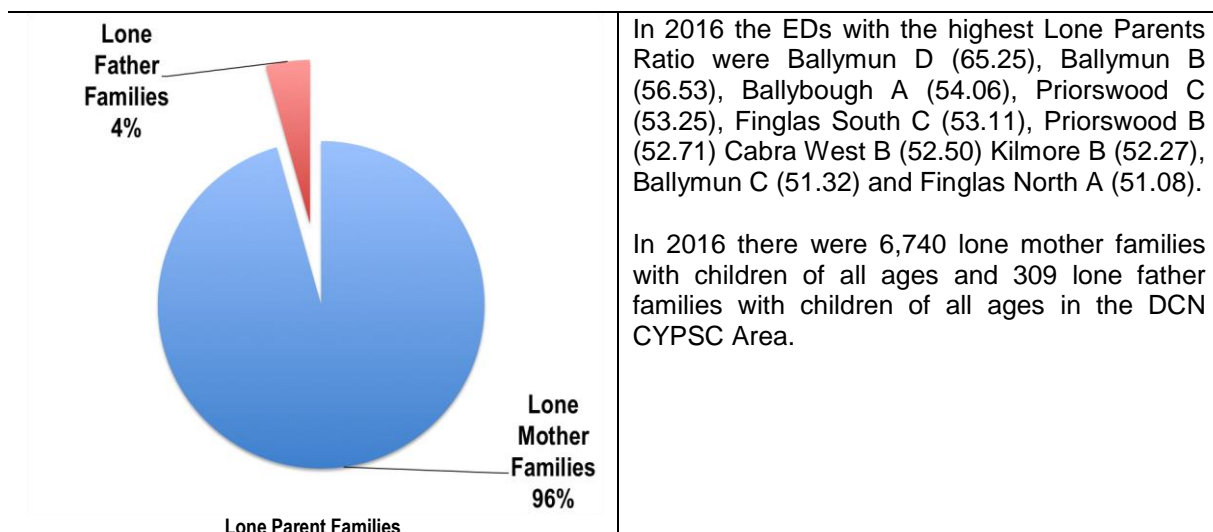

## Young Age Dependency

In 2016 the young dependency ratio in the Dublin City North CYPSC Area was 25.6% whilst in Dublin City it was 20.9%. The young-age-dependency ratio is the ratio of the number of young people at an age when they are generally economically inactive, (under 15 years of age), compared to the number of people of working age (i.e. 15-64).

## 1.2 Family Structure

In 2016 there were 76,890 families in the DCN CYPSC Area. Of these there were 22,557 families with all children under 15 years of age. Of these, the majority (84%) had either one or two children.

### 1.3 Ethnicity

In 2016 75.3% of the population of the DCN CYPSC Area was classified as '*White Irish*' compared to 82.2% of the State population, pointing to a more diverse ethnic mix. The area also had a larger percentage of population classified as '*Other White*' (11.8%) compared to the State (9.5%).

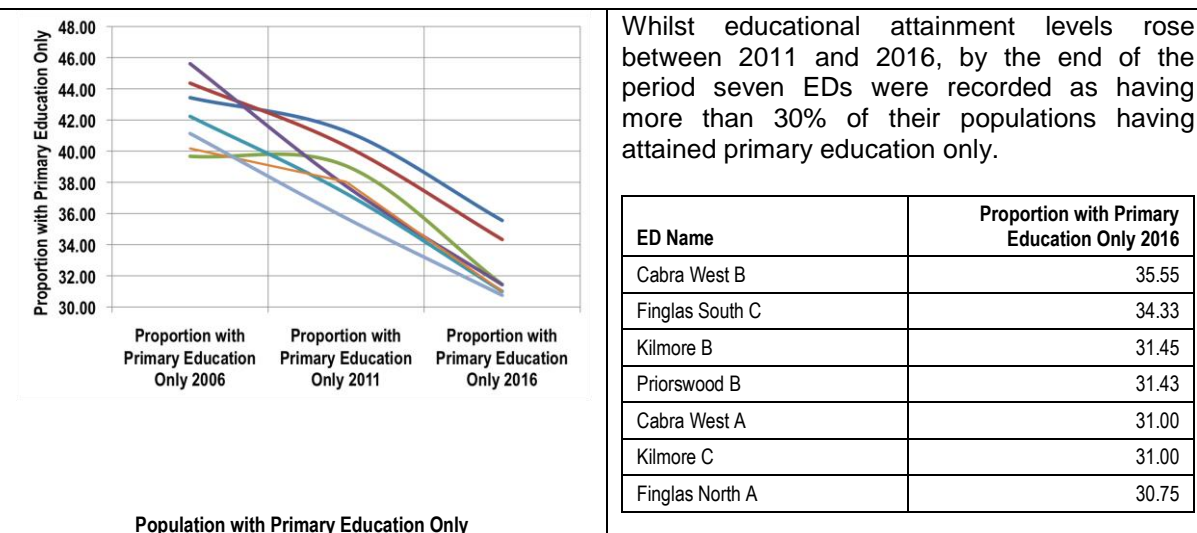

## 1.4 Affluence and Deprivation

Measured at Small Area of Population level, the Dublin City North CYPSC Area contains the full spectrum of affluence and deprivation.

## 1.5 Educational Attainment

## 2 Introduction

Dublin City North Children and Young People's Services Committee (DCN CYPSC) is committed to providing seamless and integrated services for children, young people and families.

The overarching aim of DCN CYPSC is to improve the outcomes for children and young people in Dublin City North through effective interagency structures, communication and importantly agreed goals reflecting the five national outcomes identified in *Better Outcomes, Brighter Futures (BOBF): the National Policy Framework for Children and Young People 2014 – 2020*.

### 2.1 Profile Structure

The structure of the following Socio-Demographic Profile has been designed to accord with the indicator set that has been developed for BOBF. The stated purpose of the indicator set is to 'to track progress for children and young people aged 0–24 across the five national outcomes outlined in BOBF'. The five national outcomes that are required for all children and young people are designed to ensure that the individual is: -

1. Active and healthy with physical and mental well-being;
2. Capable of achieving full potential in all areas of learning and development;
3. Safe and protected from harm;
4. Provided with economic security and opportunity; *and*
5. Connected, respected and contributing to their world.

The Socio-Demographic Profile is an element of the analysis designed to identify the needs of children, young people and families in Dublin City North, and the extent to which services and resources available in the county are meeting those needs.

#### 2.1.1 Alignment with BOBF Indicator Set

The following table summarises the alignment between the socio-demographic data sets and the BOBF indicator set.

**Table 1 – BOBF Indicator Set Alignment**

Socio-Demographic Profile	Profile Scope	BOBF Indicator Set
Demography	Population Change	Demographic Baseline Profile
	Population Pyramid	
	Birth Rate	
	Young Mothers	
	Population by Age Band	
	Young Dependency Ratio	
	Ethnicity	
Economy	Labour Force Unemployment	Economic Security and Opportunity
	Live Register	
	Live Register: Under 25 Years of Age

## 2.2 Evidence Base

The evidence base upon which this profile has been based is drawn from a variety of sources, principally including the following: -

- ❑ CSO Census of Population 2016, and previous census data;
- ❑ Pobal HP Deprivation Index 2016 (Haase, T. and Pratschke, J. 2017).

Where possible, the indicators have been disaggregated to the most localised area at which reliable data is available.

### 2.2.1 Census Data Resolution

Generally, Section 3: Dublin City North Overview references CSO Census of Population 2016 Electoral Division (ED) data. Subsequent sections use the CSO Census of Population 2016 Small Area of Population (SAPS) data.

The geographical area covered by the DCN CYPSC extends from the North East Inner City Dublin out through Cabra, Finglas, Ballymun and Beaumont/Donaghmede. Whilst this area has significant strengths in terms of a strong community and established interagency working arrangements, it has also been identified as a community with instances of both high levels of deprivation and complex needs.

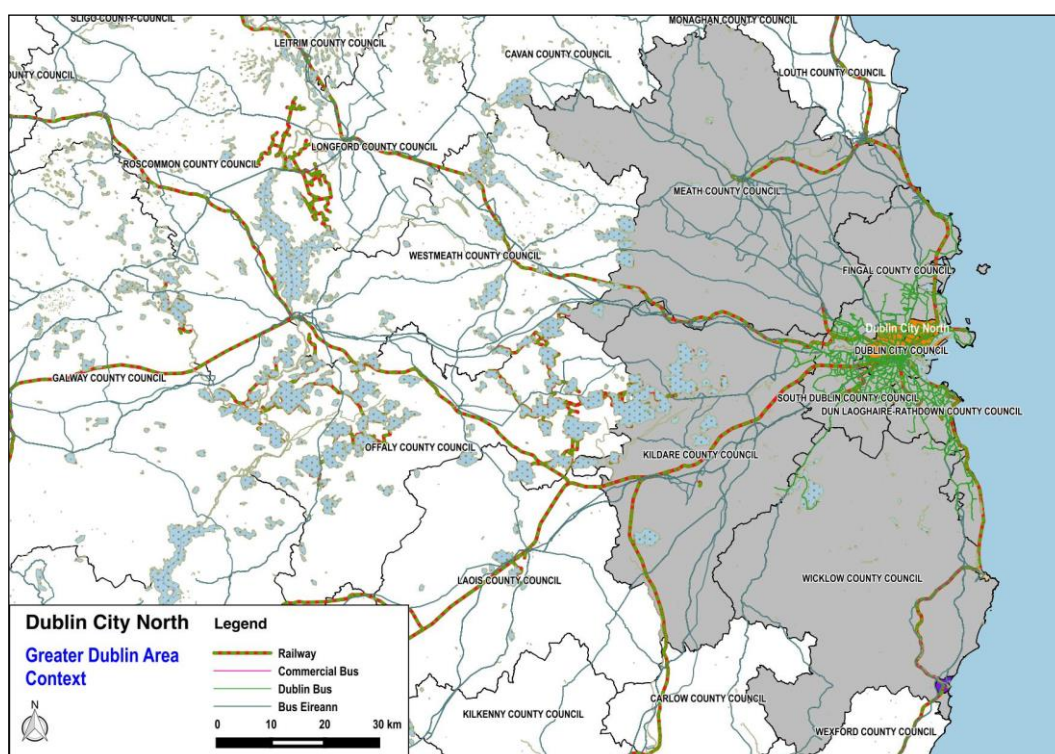

### 3 Dublin City North Overview

#### Greater Dublin Area

The Greater Dublin Area (GDA) includes the geographical area of Dublin City, Dun Laoghaire-Rathdown, Fingal, South Dublin County, Kildare, Meath, and Wicklow and incorporated the regions of both the former Dublin Regional Authority and the Mid-East Regional Authority.

In 2016 the total population of Dublin City North CYPSC Area was 325,385, representing 17.0% of the total population of the Greater Dublin Area (1,907,332). In 2016 the Greater Dublin Area population represented 40.0% of the population of the State (4,761,865).

**Map 1 – Greater Dublin Area Context**

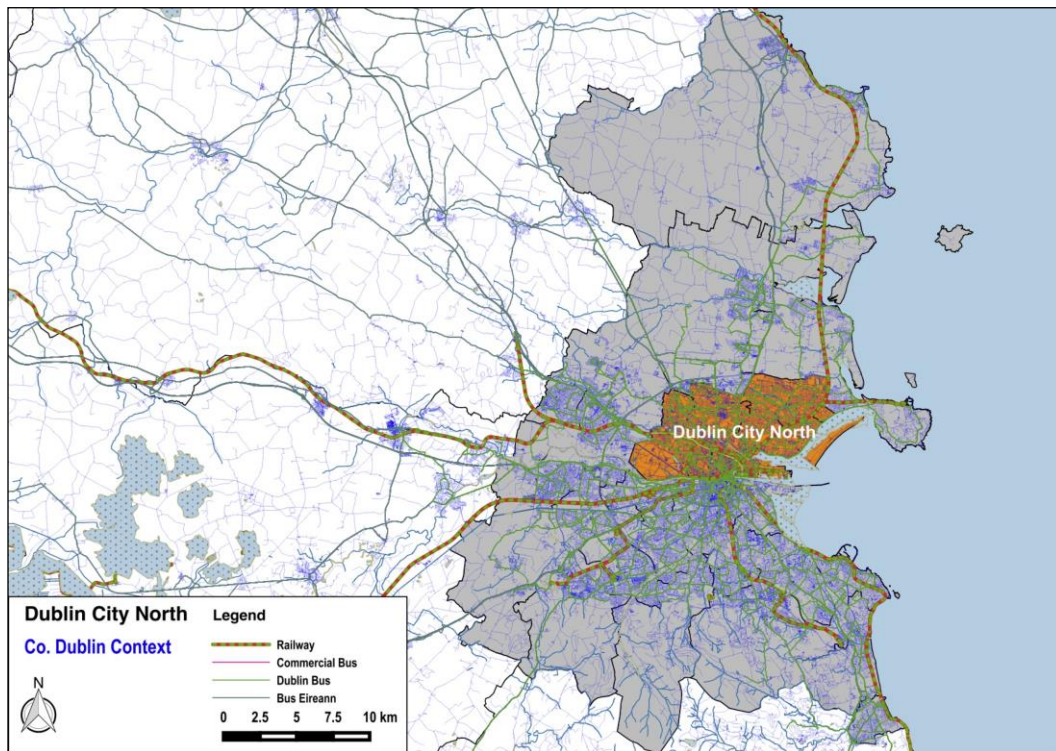

#### County Dublin

The Dublin Region (Co. Dublin) comprises the constituent city/county council administrative areas of South Dublin County, Dún Laoghaire-Rathdown County and Fingal County. The Region occupies an area of some 921 km<sup>2</sup> (92,100 hectares). In 2016 the Dublin Region had a population of 1,186,656, representing an increase of 0.07% over the intercensal period 2011-2016.

The Dublin City Council administrative area is divided into Dublin City South and Dublin City North CYPSC Areas.

In 2016 the total population of Dublin City North CYPSC Area was 325,385, representing 27.4% of the total population of Co. Dublin.

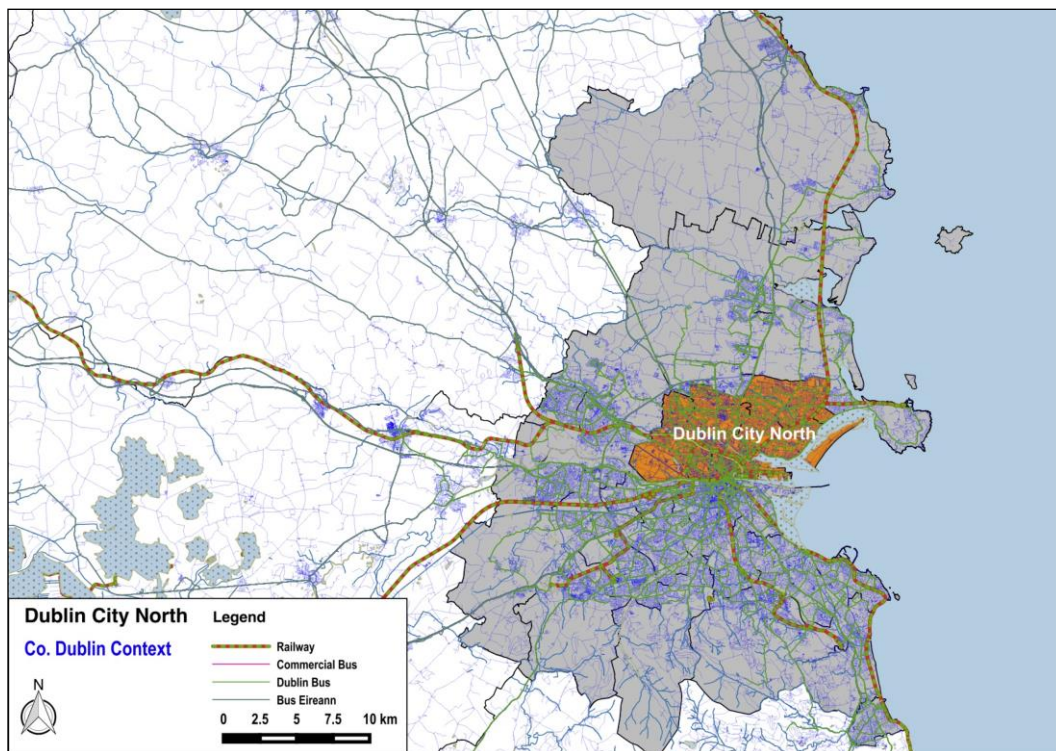

**Map 2 – Co. Dublin Context**

## **Dublin City**

The political, cultural and economic capital of Ireland, Dublin City is home to 554,554 people (CSO Census 2016) and host to many workers, students and visitors on a daily basis. Over the intercensal period 2011-2016 the population of Dublin City grew by 5.1% from 527,612 people.

**Map 3 – Dublin City Context**

The City covers an area that stretches from Donaghmede in the northeast to Terenure in the south, and bordered by the Phoenix Park to the west and Dublin Bay to the east.

Dublin City is the most populous local authority area in Ireland, representing 11.6% of the population of the State. In 2016 the total population of Dublin City North CYPSC Area represented 58.7% of the total population of Dublin City.

### 3.1 Demography

In the period 1991-2011 Ireland experienced a population growth of 30.1%, with the Dublin Region growing at the slightly lower rate of 24.2%. The 2016 Census showed that the rate of population growth across the State since 2011 had slowed significantly, reflecting the impact of the economic downturn of 2007-2008 and the resulting high levels of emigration.

**Table 2 – Comparative Total Population 2016**

	Population - 2011	Population - 2016	Actual change 2011-2016	Percentage change 2011-2016	Population density (persons per sq km)	Area (sq km)
Dublin City North CYPSC Area Total	307,495	325,385	17,890	5.8	4,401.3	73.9
Dublin City	527,612	554,554	26,942	5.1	4,780.2	116.0
State	4,588,252	4,761,865	173,613	3.8	70.0	67,980.5

Source: CSO StatBank / Profile 2 - Population Distribution and Movements / E2013

#### 3.1.1 Population Change

During the intercensal period 2011-2016 the population of the Dublin City North CYPSC Area increased by 5.8%, ahead of both Dublin City and the State.

**Figure 1 – Population Trend 2006-2016**

Source: CSO Census of Population 2006, 2011 and 2016

Dublin City Local Economic and Community Plan (LECP) 2016-2021 notes that during the 20-year period from 1991 to 2011 the population of Dublin City increased by only 10% compared to a larger increase in the State population over the same period of 30%. Additionally, the LECP notes that the

increase was not uniform across the City. During that 20-year period the area of the City that lies between the Canals saw a population increase of 62%, whilst the population of the rest of the City declined slightly (-1%) with many electoral divisions seeing a loss of population. This reflects the high level of apartment building in the inner city from the late 1980s onwards.

### Projected Population Growth Rate

The CSO (2013) Regional Population Projections 2016-2031 suggest that the Greater Dublin Area will see its population increase by just over 400,000 by 2031 if internal migration patterns return to the traditional pattern last observed in the mid-1990s. This increase would account for two thirds of the total projected population growth in the state over this period under the M2F2<sup>1</sup> scenario (613,000).

Alternatively, a modified 2011 internal migration pattern of more focused net inflow into Dublin would result in Dublin absorbing a greater share of this GDA growth, increasing by 286,000 of the total projected growth compared with just 110,000 in the remainder of the GDA.

**Table 3 - Regional Population Projections 2016-2031**

Regional Authority Area	Population 2011	Natural increase	Internal migration	External migration	Total increase	Population 2031	Average annual increase
	Thousands						%
Border	516	49	-22	-9	18	533	0.2

### 3.1.2 Population Density

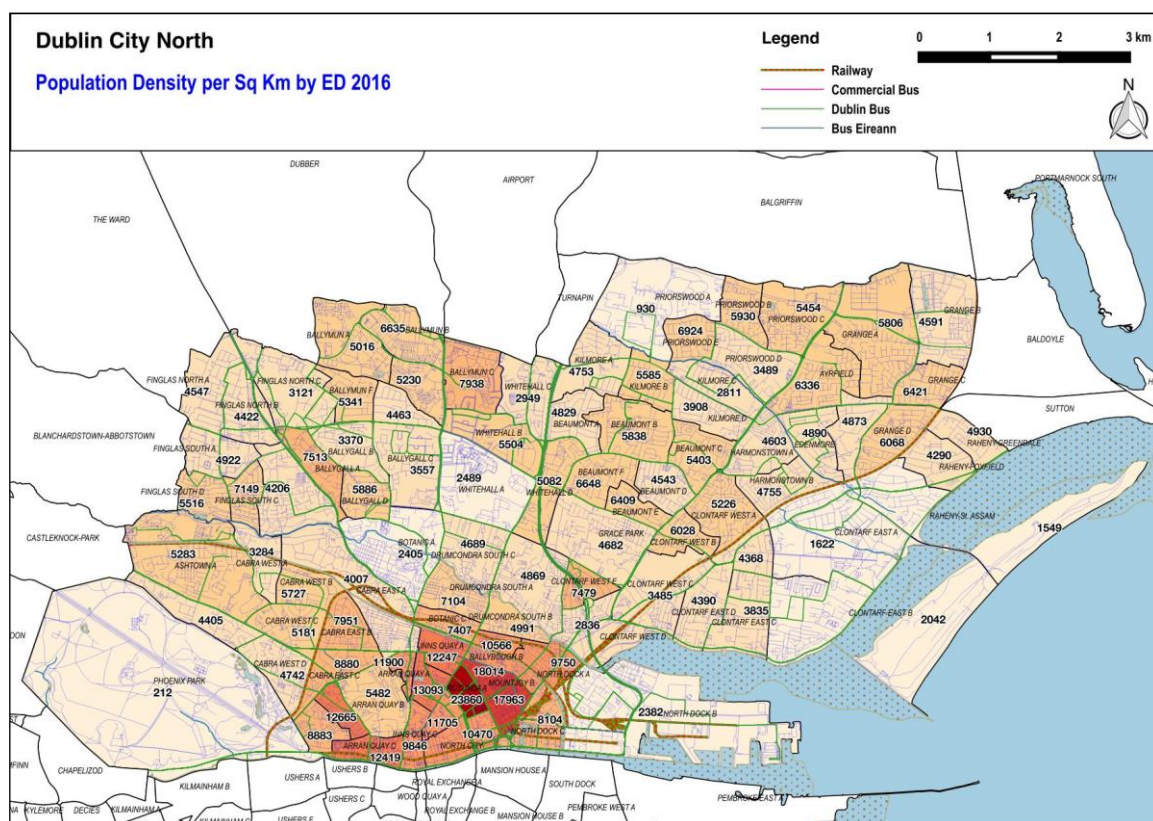

In 2016, the total population density for the State was 70 persons per sq km. Dublin City North CYPSC Area contained the three most densely populated EDs in the State, as below.

### Table 6 – Most Densely Populated EDs

	Population 2016	Area Sq Km	Population Density (persons per sq km)
Rotunda A	5,965	0.25	23,860.4
Mountjoy A	5,389	0.30	18,014.7
Mountjoy B	3,963	0.22	17,963.5
<i>Dublin City</i>	554,554	116.01	4,780.3

### 3.1.3 Population Pyramid

## Population by Age Group

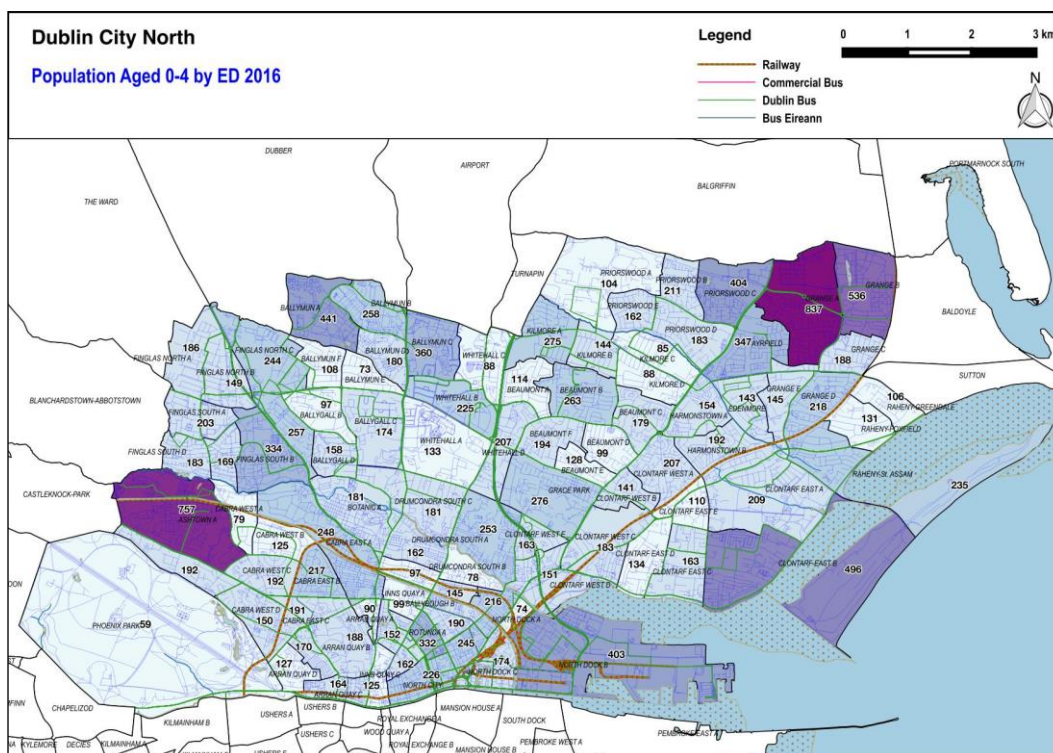

### Figure 2 – Population by Age Group 2016

Source: CSO Census of Population 2016

The following series of maps track the 2016 Census age bands to the EDs across the North Dublin City Area, illustrating the relative population dispersion.

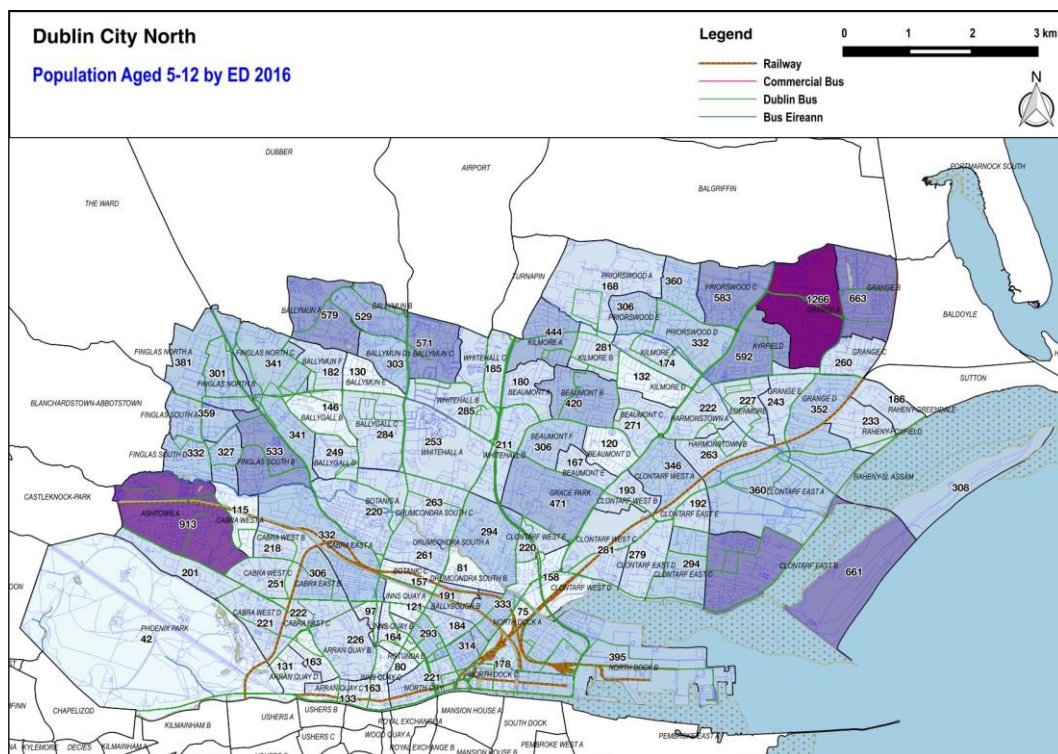

### Map 5 - Population 0 to 4 Years of Age by ED

Source: CSO Census of Population 2016

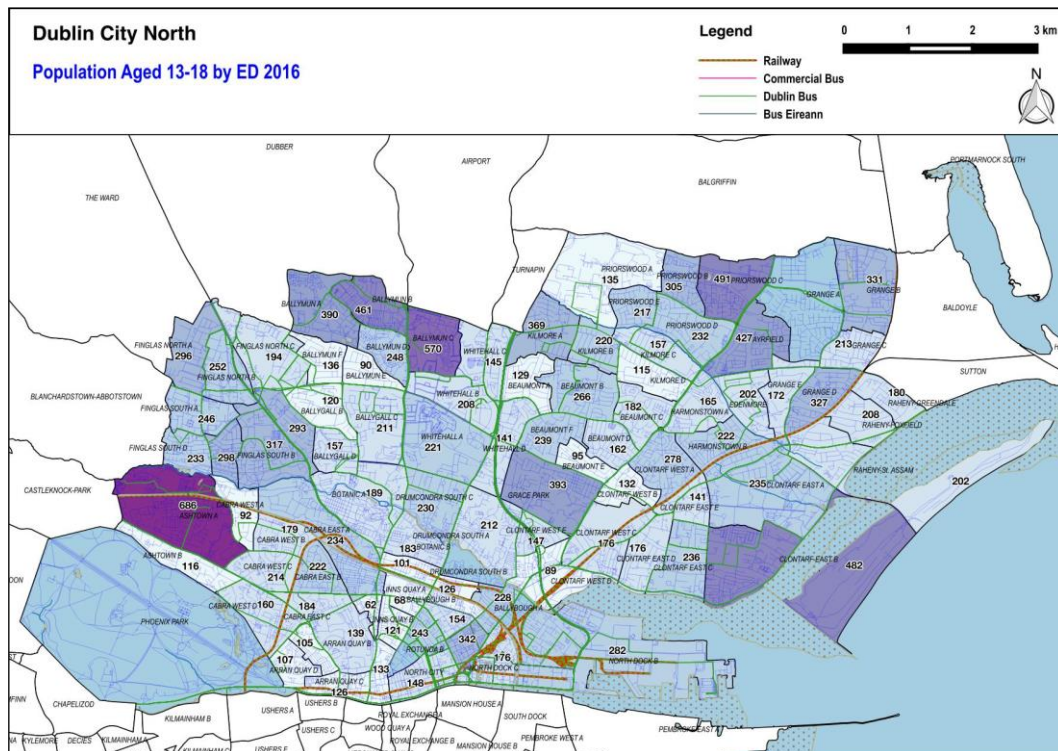

Map 6 - Population 5 to 12 Years of Age by ED

Source: CSO Census of Population 2016

Map 7 - Population 13 to 18 Years of Age by ED

Source: CSO Census of Population 2016

Age	Male	Female
Age 19	2000	2050
Age 18	1950	2000
Age 17	1800	1650
Age 16	1650	1550
Age 15	1550	1500
Age 14	1500	1550
Age 13	1450	1500
Age 12	1400	1500
Age 11	1400	1500
Age 10	1400	1500
Age 9	1400	1550
Age 8	1600	1700
Age 7	1800	1800
Age 6	1800	1800
Age 5	1800	1850
Age 4	1800	1850
Age 3	1800	1850
Age 2	1800	1900
Age 1	1800	1750
Age 0	1900	1950

In 2016 there was a total population aged 0-19 of 70,083 in the Dublin City North CYPSC Area. Of these, 8,117 were aged 18-19 (11.6%). The total population aged 20-24 stood at 25,596, which represented 26.75% of the total population aged 0-24 (95,679 persons).

### 3.1.4 Birth Rate

#### State

Eurostat records that in 2016 a total of 13.5 babies were born per 1,000 residents in the State, surpassing the European average of 10 births. These findings suggest that Ireland had the highest birth rate in the EU.

There were 63,900 live births in Ireland in 2016, which is more than double the number of 30,400 deaths or 6.4 per 1,000 residents recorded. This led to a natural population change of +7.1 per 1,000 inhabitants, which was the largest natural rise in the EU in 2016.

**Table 7 – Birth Rate per 1,000 Population**

State		2014	2015	2016
Male	Births (Number)	34,681	41,594	32,819
Female	Births (Number)	32,614	23,942	31,078
Total	Births (Number)	67,295	65,536	63,897
	Birth Rate per 1,000 Population (Rate)	14.6	14.0	13.7

Source: CSO StatBank / Births Occurrence / VSA18 / Select from table VSA18

The CSO<sup>2</sup> reports that there were 16,487 births in Q1 2017, some 7 more births compared with the same period in 2016. This corresponds to a birth rate of 14.1 per 1,000 of population, representing a decrease of 0.1 from Q1 2016.

There were 40 infant deaths registered giving an infant mortality rate of 2.4 per 1,000 live births

The average age of first time mothers was 31.0, up 0.2 years from the same period in the previous year. The average age of mothers at maternity for births registered in Q1 2017 was 32.8 years, which was 0.1 higher than Q1 2016.

The average age of first time mothers outside marriage or civil partnership was 28.8 while the average age of all mothers outside marriage/civil partnership was 30.1 years. In the same quarter in 2016, the average age of mothers having their first baby outside marriage or civil partnership was 28.4 years while it was 29.9 years for all mothers for births registered outside of marriage or civil partnership.

#### Dublin City

**Table 8 – Dublin City Registered Births**

Dublin City	2016Q2	2016Q3	2016Q4	2017Q1	2017Q2
Births Registered (Number)	1,780	1,884	1,676	1,832	1,704
Births within Marriage (Number)	1,051	1,068	951	1,045	973
Births outside Marriage (Number)	729	816	725	787	731
Average Age of Mother - First Births only (Years)	31.2	31.1	31.1	31.1	31.3
Average Age of Mother - outside Marriage (Years)	30.2	30.4	30.5	29.9	30.3
<b>State</b>					
Average Age of Mother - First Births only (Years)	30.8	30.8	31.1	31.0	31.1
Average Age of Mother - outside Marriage (Years)	30.0	30.0	30.4	30.1	30.2

Source: CSO Vital Statistics VSQ12

#### Dublin City North Estimate

In 2016 there were 7,273 births registered in Dublin City<sup>3</sup>, representing a rate of 14.5 per 1,000 of population. Given that the population of the Dublin City North CYPSC Area represented some

<sup>2</sup> CSO Vital Statistics (August 2017)

<sup>3</sup> Source: StatBank / Births Registered / VSQ12 (Provisional)

58.67% of the population of Dublin City in 2016, the number of births from the Dublin City North CYPSC Area can be estimated to be approximately 4,267.

### 3.1.5 Young Mothers

The CSO reports that nationally the number of teenage pregnancies has fallen by 64% from 3,087 in 2001 to 1,098 in 2016. This equates to a decrease in the teen birth rate from 20 per 1000 of women aged 15-19 in population in Ireland in 2001 to 7.8 per 1000 of in 2016.

**Table 9 – Mothers Aged 15 to 24 by Live Births (State 2016)**

State	Previous Number of Live Born Children						
Age of mother at maternity	Total	0	1	2	3	4	5 or more
15 Years of Age and under	20	20	–	–	–	–	–
16 Years of Age	51	49	2	–	–	–	–

### 3.1.6 Young Dependency Ratio

The young dependency ratio is the number of young people of 0-14 years of age as a %age of the population of working age. The working age population is defined as those of 15 to 64 years of age.

In 2016, Dublin City North CYPSC Area had a total population of 52,000 of 0-14 years of age. In 2016, the total working age population of 15 to 64 years of age in the Dublin City North CYPSC Area was 203,063.

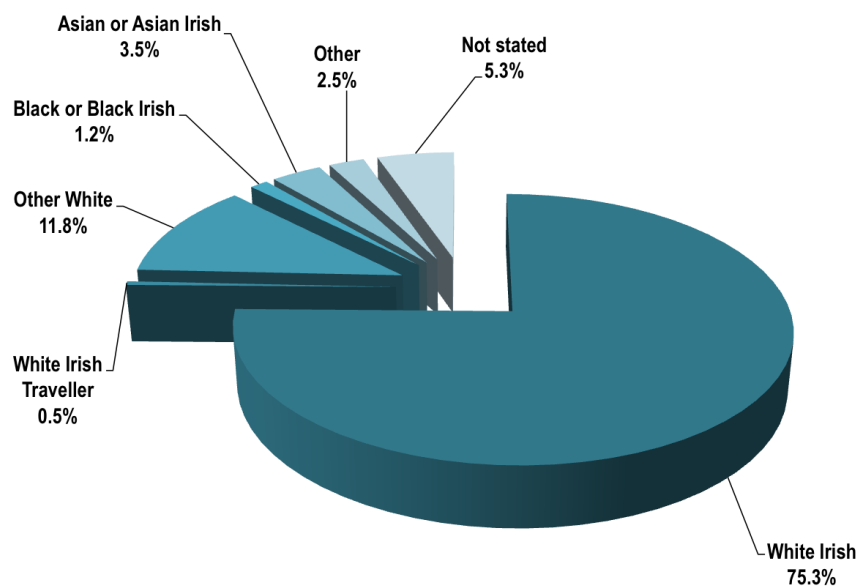

In 2016 the young dependency ratio in the Dublin City North CYPSC Area was 25.6%. By comparison, Meath had the highest young dependency ratio at 39%, followed by Laois and Longford at 38.3% and 37.2% respectively. At other end of the spectrum Cork City (20.4%), Dublin City (20.9%), Galway City (23.4%) and Dún Laoghaire-Rathdown (27.9%) all had the lowest young dependency ratios.

### 3.1.7 Ethnicity

In 2016 75.3% of the population of the DCN CYPSC Area was classified as 'White Irish' compared to 82.2% of the State population, pointing to significantly greater ethnic diversity than is to be found elsewhere. The area also had a larger percentage of population classified as 'Other White' (11.8%) compared to the State (9.5%).

Dublin City LECP notes that the Traveller and Roma communities are particularly vulnerable to poverty and social exclusion, and face barriers in accessing education, training, employment and services.

Census 2016 reports that there were 1,156 White Irish Travellers living in the Dublin City North CYPSC Area; the Census did not include 'Roma' as an ethnic identifier, although it is estimated that there are some 5,000 Roma people living in Ireland (Nasc - the Irish Immigrant Support Centre: 2015).

**Figure 3 – DCN CYPSC Area Ethnicity 2016**

## **3.2 Economy**

### **3.2.1 Dublin City Development Plan (2016-2022)**

The Dublin City Development Plan (2016-2022) notes that future economic success will depend on the continued strength of the enterprise and services base. The internationally traded services sector is vital to a small open city economy such as Dublin. The US and Europe will continue to be important investors, alongside domestic investors, but other countries such as China will be a major potential source of investment.

The locally traded services sector (e.g. entertainment, restaurants, cultural and other services etc.) is a major wealth and employment generator and plays a pivotal role in determining the performance of the economy. Social entrepreneurs and social enterprise have a major role to play in improving the economy and quality of life in the city.

Markets, both indoor and outdoor, are increasing in number and success.

Dublin is successful in attracting international students and English language students in line with national and City Council development plan policies.

The various food sectors in the city are a growth industry. The City Council has published a report, *'Food and the City'* (2011), that outlined the employment and economic development potential of the various sub-sectors.

The café/restaurant sector is thriving in the city: they are important sources of employment and critical in making the city attractive for workers, visitors and residents.

One emerging economic generator in the city is craft distilleries and visitor centres. Craft distilleries and breweries with visitor centres offer great potential for Dublin, which has a great but lost heritage of distilling.

Digital enterprises are a key growth area and the City Council has published a *'Digital Masterplan for Dublin'* (2013).

### **3.2.2 Dublin Economic Monitor (October 2017)**

The Dublin Economic Monitor (October 2017)<sup>4</sup> notes that the Dublin unemployment rate continued on a downward trajectory in Q2 2017 to reach a nine-year low of 6.1%. This was 1.4% below the same quarter in 2016 and underlined the significant ongoing progress that is being made in job creation across the capital. The construction sector has led employment growth in Dublin in recent quarters, with high levels of office construction and rising house building levels feeding through to employment. The sector now employs over 36,000 workers, which is approximately at the midpoint between the trough in 2013 (17,800) and the peak in 2008 (59,700).

Dublin's seasonally adjusted unemployment rate declined by 0.3% in Q2 2017 to stand at a nine-year low of 6.1%. This was 1.4% below the same quarter in 2016 and reflected improving labour market conditions in the capital where almost 10,000 jobs were created year-on-year.

The Dublin Economic Monitor (October 2017) also noted that employment levels in Dublin rose at a modest rate in Q2 2017 with the construction sector driving growth. Total employment increased at a seasonally adjusted rate of 1.5% year-on-year, with the construction and public sectors recording the strongest growth rates at 21.7% and 3.6% respectively. Industry recorded a year-on-year decline in employment levels, but this was more than offset by the robust job creation in construction. Private sector services employment was broadly stable year-on-year.

---

<sup>4</sup> The Dublin Economic Monitor is a joint initiative on behalf of the four Dublin Local Authorities, co-ordinated by the City Council.

### 3.2.3 Dublin City Labour Force Participation Rate

The Labour Force Participation Rate is calculated by expressing the labour force (i.e. those at work, looking for first regular job and unemployed) as a percentage of the total aged 15 years and over.

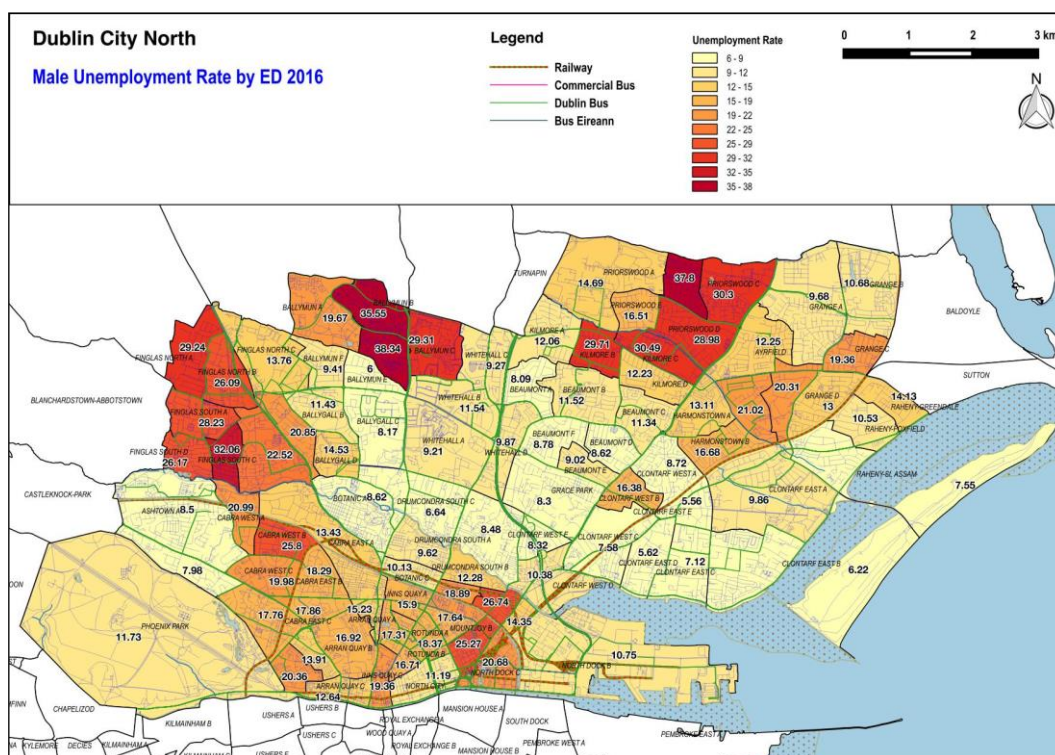

**Table 11 – Labour Force Participation Rate 2011-2016**

Age Bands	Dublin City	2011	2016
<b>Male</b>			
15 - 24 years	Labour Force Participation Rate	42.4	42.2
	Unemployment Rate	41.6	24.0
25 - 34 years	Labour Force Participation Rate	87.1	90.1
	Unemployment Rate	19.0	11.6
<b>Female</b>			
15 - 24 years	Labour Force Participation Rate	39.1	39.6
	Unemployment Rate	28.6	19.4
25 - 34 years	Labour Force Participation Rate	81.9	82.3
	Unemployment Rate	14.0	11.9

Source: StatBank / Select from table EZ005

The comparative State Labour Force Participation Rate for males aged 15-24 in 2016 was 34.5%, and for females it was 30.4%.

**Map 9 – Male Unemployment Rate by ED**

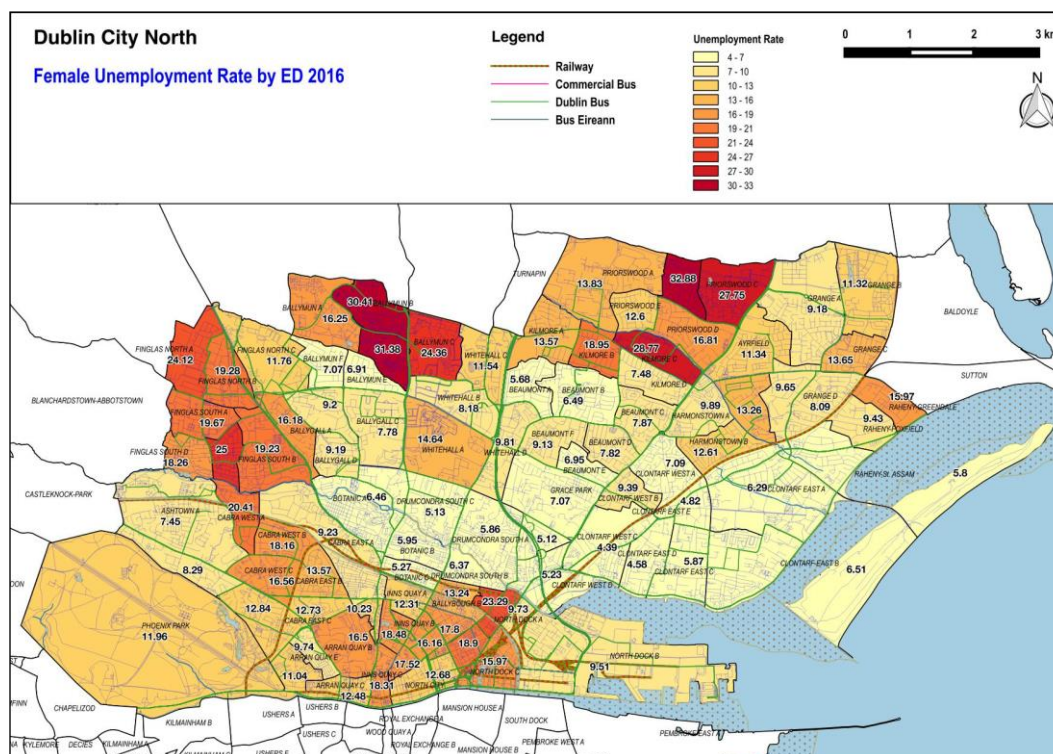

Source: 2016 Pobal HP Deprivation Index: Haase, T. and Pratschke, J. (2017)

The State Unemployment Rate for males aged 15-24 in 2016 was 27.3%, and for females it was 23.7%.

From the above it can be seen that for those aged 15-24 in 2016 there was a higher Labour Force Participation Rate in Dublin City compared to the State, and also a lower Unemployment Rate (the latter particularly in the case of females). In 2016 the employment rate in Ireland for women was 59.5%, below the EU average of 61.4% and the eleventh lowest in the EU. The employment rate for

men in Ireland was 69.9%, below the EU average rate of 71.8% and the twelfth lowest rate in the EU.

**Map 10 – Female Unemployment Rate by ED**

Source: 2016 Pobal HP Deprivation Index: Haase, T. and Pratschke, J. (2017)

### 3.2.4 Live Register

The Live Register is compiled from returns made directly to the CSO by each of the local offices of the Department of Social Protection. It is specifically not designed to measure unemployment, however, it provides an invaluable short-term trend indicator of unemployment.

Included on the Live Register are the following: -

- ❑ All those on Jobseekers Benefit (JB) - excluding systematic short-time workers;
- ❑ All those on Jobseekers Allowance (JA) - excluding smallholders/farm assists and self-employed persons;
- ❑ Part-time workers (those who work up to 3 days per week), seasonal and casual workers entitled to Jobseekers Allowance or Benefit; and
- ❑ Those signing on for 'PRSI credits' but receiving no payment.

Based on 2015 Q4 national indices, the Nevin Economic Research Institute<sup>5</sup> predict positive, but uncertain, economic growth trends to continue. There is a persistent note of concern at low wage growth and the relative levels of persistently high youth (19%) and long-term unemployment rates (55% of unemployed).

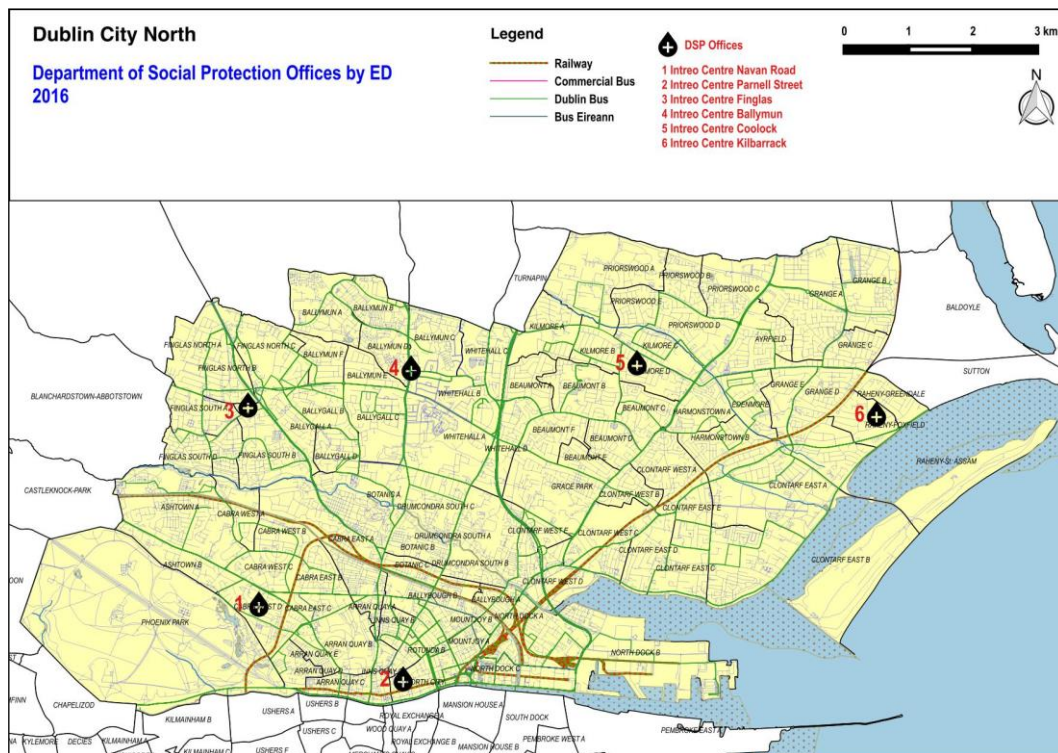

There are six DSP (Intreo) local offices within the Dublin City North CYPSC Area; these are located at Navan Road, Parnell Street, Finglas, Ballymun, Coolock and Kilbarrack.

Individuals registered at specific DSP local offices may not necessarily reside within their immediate environs.

**Map 11 – DCN DSP/Intreo Offices**

### 3.2.5 Live Register: Under 25 Years of Age

Youth unemployment remains a considerable challenge. A new youth employment support scheme is expected to be introduced in 2018. This will aim to provide long-term-unemployed young people with the opportunity to learn basic work and social skills in a supportive environment while on a work placement.

The CSO reports that in the year to November 2017 the number of persons aged 25 and over at State level on the Live Register decreased by 34,090 (-14.1%), and the number of persons aged under 25 decreased by 5,861 (-19.0%).

Annual decreases in persons aged under 25 have occurred in all months since July 2010.

The percentage of persons aged under 25 on the Live Register stands at 10.7% for November 2017, down from 11.3% in November 2016 and 12.4% in November 2015.

### 3.2.6 Labour Market Activation Programmes

The following table records the State Labour Market Activation Programme participants by month. It is noted that the number of participants on activation programmes seasonally increased by 19.3% between June and November 2017, compared to 14.9% in the period June to November 2016.

**Table 12 – Labour Market Activation Programme Participants**

	Jun 2017	Jul 2017	Aug 2017	Sep 2017	Oct 2017	Nov 2017

### 3.3 Family Structure

In 2016 there were 76,890 families in the Dublin City North CYPSC Area. Of these, the highest proportion 2,755 (3.6%) was located in Ashtown A ED. 11,494 families were at pre-family stage, with 8,013 at pre-school stage, and 7,752 at early school stage.

**Figure 6 – Families by Family Composition 2016**

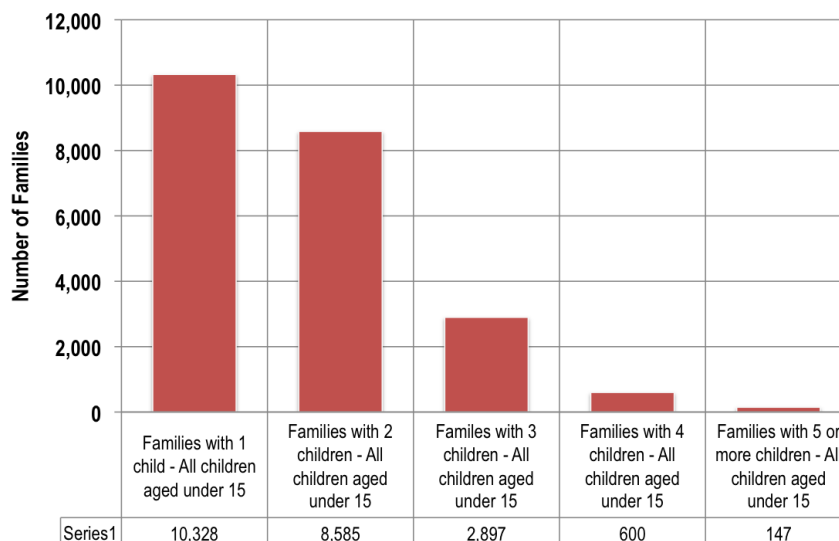

Source: CSO Census of Population 2016

### 3.3.1 Families with Children Under 15 Years of Age

In 2016 there were 22,557 families with all children of less than 15 years of age in the Dublin City North CYPSC Area. The ED with the largest number of families with children of less than 15 years of age was Grange A (1,024 families).

**Figure 7 – Families with Children <15 Years of Age**

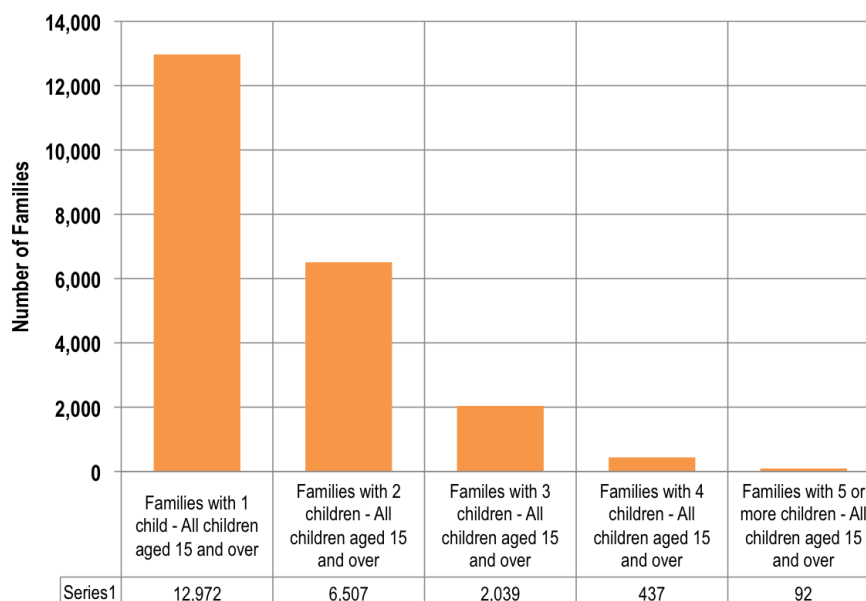

Source: CSO Census of Population 2016

### 3.3.2 Families with Children of 15 Years of Age and Over

In 2016 there were 22,047 families with all children of more than 15 years of age in the Dublin City North CYPSC Area.

**Figure 8 – Families with All Children Aged 15+**

Source: CSO Census of Population 2016

### 3.3.3 Lone Parents

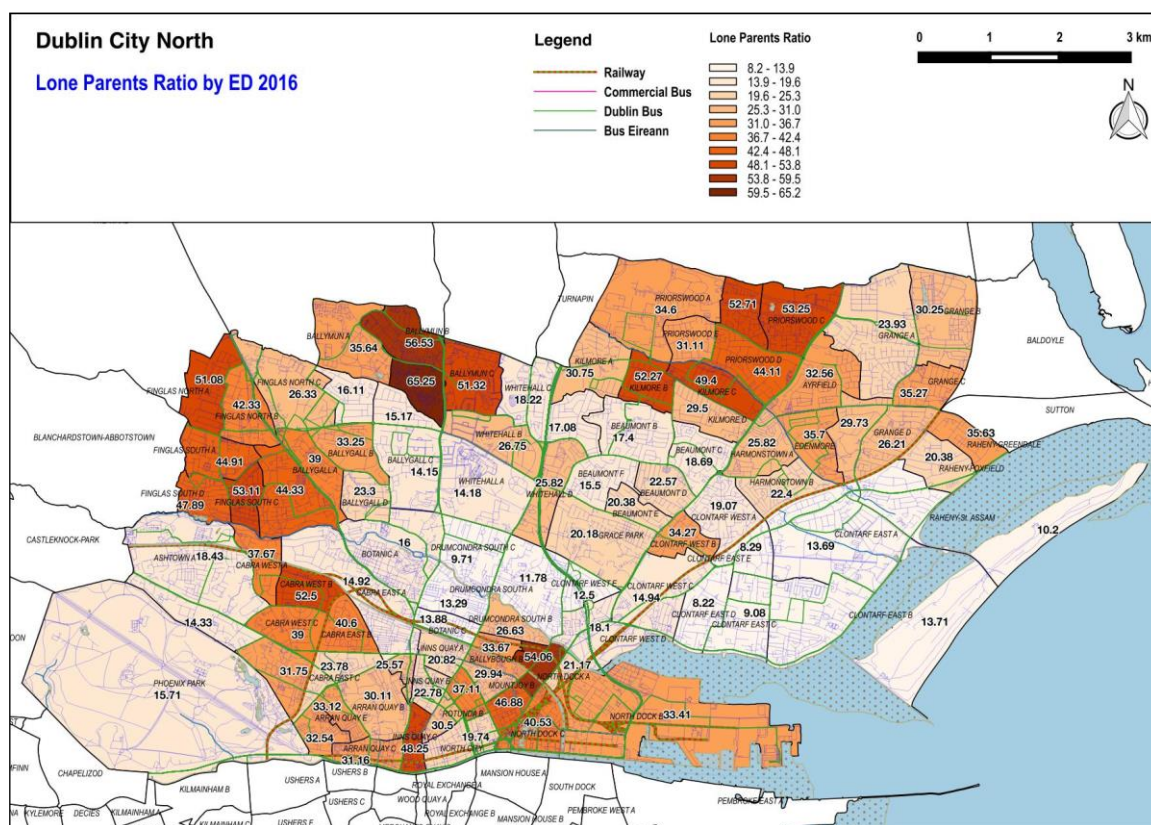

The CSO national Survey on Income and Living Conditions (SILC) 2016 confirms that lone parents are more likely than any other social group to be living in poverty.

**Table 13 – Lone Parent Poverty Rate (Children Under 18)**

Base Year 2012	State Indicator 2016
Median Real Household Disposable Income	€22,845
Mean Real Household Disposable Income	€25,353
Median Nominal Household Disposable Income	€23,090
Mean Nominal Household Disposable Income	€25,625
Median Equivalised Real Disposable Income	€13,693
Mean Equivalised Real Disposable Income	€14,648
Median Equivalised Nominal Disposable Income	€13,840
Mean Equivalised Nominal Disposable Income	€14,805
At Risk of Poverty Rate	40.2%
Deprivation Rate <sup>6</sup>	50.1%
Consistent Poverty Rate	24.6%

Source: CSO Census of Population 2016

**Map 16 - Lone Fathers: All Children 15 Years of Age +**

Source: CSO Census of Population 2016

In 2016, a total of 31,022 children of all ages lived in single parent families in the Dublin City North CYPSC Area.

In 2016, 9,929 children of less than 15 years of age lived in lone mother families and 547 children of less than 15 years of age lived in lone father families in the Dublin City North CYPSC Area.

In 2016, 11,300 children of 15 years of age and over lived in lone mother families and 2,197 children of 15 years of age and over lived in lone father families in the Dublin City North CYPSC Area.

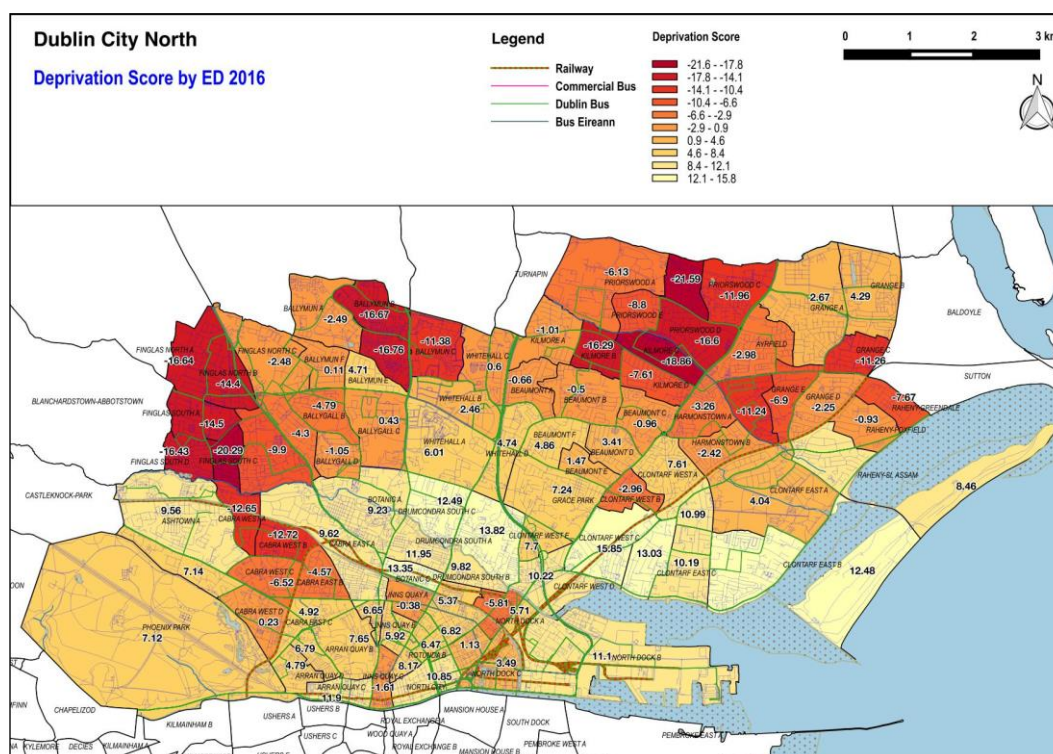

### 3.4 Affluence and Deprivation

The Pobal HP<sup>7</sup> Deprivation Index measures the relative affluence or disadvantage of an area using data compiled from various censuses. A scoring is given to the area based on a national average of zero and ranging from approximately -35 (being the most disadvantaged) to +35 (being the most affluent). In addition to this, percentage data for the area is given under the following categories: -

1. Population Change;
2. Age Dependency Ratio;
3. Lone Parent Ratio;
4. Primary Education Only;
5. Third Level Education;
6. Unemployment Rate (male and female); and
7. Proportion living in Local Authority Rented Housing.

In 2016 there were considerable local differences in the relative affluence and deprivation across the Dublin City North CYPSC Area.

**Map 17 – Deprivation Score 2016**

Source: 2016 Pobal HP Deprivation Index: Haase, T. and Pratschke, J. (2017)

<sup>7</sup> Pobal HP Deprivation Index (Haase and Pratschke, 2012)

### 3.4.1 Incidence of Disadvantage

In 2016, the deprivation score for County Dublin (including Dublin City) was 4.12. In 2011 the score was 3.74.

Of the total of 93 EDs in the Dublin City North CYPSC Area in 2016, 13 were classified as affluent.

**Table 14 – Most Affluent EDs 2016**

ED Name	Deprivation Score 2006	Deprivation Score 2011	Deprivation Score 2016	HP Classification
Clontarf West C	10.95	14.68	15.85	Affluent

### 3.4.2 Very Disadvantaged EDs 2016

There were no EDs in the Dublin City North CYPSC Area in 2016 that were '*Extremely Disadvantaged*', according to the Pobal HP classification.

In 2016 a total of 2,145 young people aged 0-24 lived in the EDs classified as being '*very disadvantaged*'.

**Table 15 – Very Disadvantaged EDs 2016**

ED	Deprivation Score 2006	Deprivation Score 2011	Deprivation Score 2016	HP Classification

In 2016 a total of 16,208 young people aged 0-24 lived in EDs classified as being '*disadvantaged*' in the Dublin City North CYPSC Area. The table below shows the classification of the population aged 0-24 by HP Deprivation Index 2016.

**Figure 9 – Affluence and Deprivation Age 0-24**

Source: 2016 Pobal HP Deprivation Index: Haase, T. and Pratschke, J. (2017)

Dublin City North CYPSC Area contains significant clusters of high deprivation, which are masked by population in-migration of more affluent cohorts. Whilst the ED-level HP Index Scores are based on the Small Areas of Population analysis, a more precise local picture is presented in the EA profiles (Section 4 onwards).

### 3.4.4 Children at Risk of Poverty

The CSO Survey on Income and Living Conditions (SILC) in Ireland is a household survey covering a broad range of issues in relation to income and living conditions. It is the official source of data on household and individual income and also provides a number of key national poverty indicators, such as the '*at risk of poverty*' rate, the rates of enforced deprivation and the consistent poverty rate.

**Table 17 – Population at Risk by Age Group and Gender**

State	At Risk of Poverty %		Deprivation %		Consistent Poverty %	
	2014	2015	2014	2015	2014	2015
	17.2	16.9	29.0	25.5	8.8	8.7
Male	17.0	16.9	27.9	24.4	8.6	8.3

Source: After CSO SILC 2015 Table 8

The Survey on Income and Living Conditions (SILC) in Ireland is a household survey covering a broad range of issues in relation to income and living conditions. It is the official source of data on household and individual income and also provides a number of key national poverty indicators, such as the 'at risk of poverty' rate, the consistent poverty rate and rates of enforced deprivation. The table above correlates the SILC indicators with the equivalent population base in the DCN CYPSC Area.

The SILC analysis by socio-demographic characteristics showed that those most at risk of poverty in 2015 were those individuals who were unemployed (43.5%) and those living in households where there was no person at work (39.6%). The 'at risk of poverty' rate was almost as high for individuals living in accommodation that was rented at below the market rate or rent free (39.0%). The 'at risk of poverty' rate for households with one adult and one or more children aged under 18 was 36.2%.

### 3.4.5 GMS Medical Card Holders

The HSE's Primary Care Reimbursement Service (PCRS) supports the delivery of a wide range of primary care services to the general public. During 2014 3.5 million people were registered for Community Schemes services provided by General Practitioners, Pharmacists, Dentists and Optometrists or Ophthalmologist.

**Table 19 – HSE GMS Number of Eligible Persons 2014**

	Under 5 Years			5-11 Years			12-15 Years			16-24 Years		
	Female	Male	Total	Female	Male	Total	Female	Male	Total	Female	Male	Total
Dublin North Central	2,002	1,939	3,941	2,522	2,736	5,258	1,270	1,392	2,662	2,883	2,460	5,343

Source: HSE PCRS Statistical Analysis of Claims and Payments 2014

### 3.4.6 HSE Health Centres

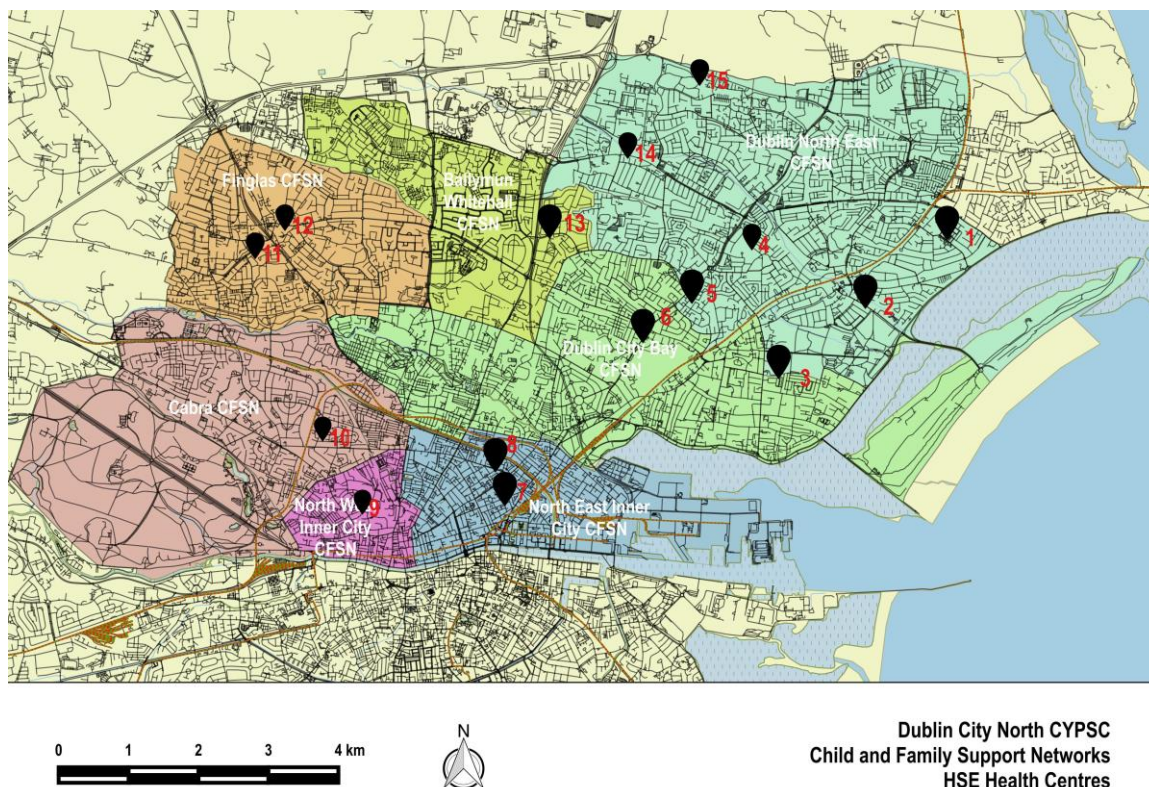

Three HSE areas cover the DCN CPSC area: Dublin North Central, Dublin North West (part) and Dublin North (part).

The following HSE Health Centres are within the DCN CYPSC area.

**Table 20 – HSE Health Centres**

Map Reference	Health Centre	HSE Area
1	Kilbarrack Health Centre, Foxfield Crescent, Kilbarrack, Dublin 5	Dublin North
2	33 Main Street, Raheny, Dublin 5	Dublin North
3	Clontarf, Vernon Avenue, Clontarf, Dublin 3	Dublin North Central
4	Edenmore Health Centre, Edenmore Shopping Centre, Dublin 5	Dublin North Central
5	Killester, Killester Avenue, Killester, Dublin 5	Dublin North Central
6	Marino, 1A Griffith Avenue, Marino, Dublin 3	Dublin North Central
7	Summerhill, Mountjoy, Dublin 1	Dublin North Central

### 3.5 Housing

In 2016 30% of the population of the Dublin City North CYPSC Area lived in accommodation owned with a mortgage or loan, representing 25% of all households.

**Figure 10 – Housing Tenure (Households) 2016**

Source: CSO Census of Population 2016

**Table 21 – Housing Tenure (Households) 2016**

	Owned with mortgage or loan	Owned outright	Rented from private landlord	Rented from Local Authority	Rented from voluntary / co-operative housing body	Occupied free of rent	Not stated	Total (No. of households)
Dublin City North	30,296	35,977	30,508	13,979	1,771	1,401	6,994	120,926
Dublin City	48,209	57,064	62,865	24,654	3,274	2,761	12,764	211,591
State	535,675	611,877	309,728	143,178	16,765	27,440	53,002	1,697,665
Dublin City North	25.1	29.8	25.2	11.6	1.5	1.2	5.8	100.0
Dublin City	22.8	27.0	29.7	11.7	1.5	1.3	6.0	100.0
State	31.6	36.0	18.2	8.4	1.0	1.6	3.1	100.0

Source: CSO Census of Population 2016

**Figure 11 – Comparative Housing Tenure 2016**

Source: CSO Census of Population 2016

From the above it can be seen that, in 2016, a lower proportion of households in the Dublin City North CYPSC Area were living in accommodation that is either owned outright or mortgaged, than is the case in the State generally. The proportion of households that were living in accommodation that was rented from the local authority was some 3% higher than was the case in the State, although the proportion was consistent with Dublin City.

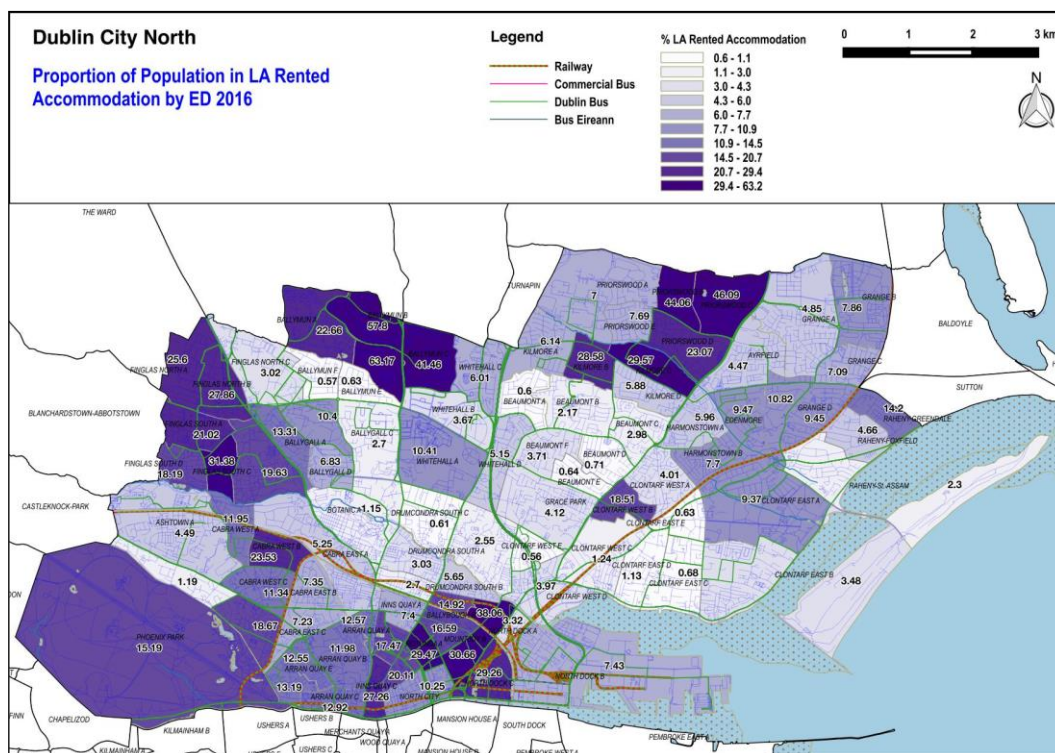

### 3.5.1 Social Housing

In 2016, a total of 1,771 households in the Dublin City North CYPSC Area were living in accommodation that was rented from a voluntary or co-operative housing body. This represents 1.5% of all households in the area and compares with 0.98% nationally.

### 3.5.2 Local Authority Housing

Of the 120,926 households in the Dublin City North CYPSC Area in 2016, a total of 13,979 were rented from the local authority. This represents 11.6% of all households in the area, and compares with 8.4% nationally.

**Map 19 – Proportion of Population LA Renting**

Source: 2016 Pobal HP Deprivation Index: Haase, T. and Pratschke, J. (2017)

### 3.5.3 Homelessness

The CSO reports that in 2016 there were 6,906 homeless people in the State. Of these, 5,009 (72%) were recorded in Dublin.

**Table 22 – Homeless Persons (State) 2016**

	Private Emergency Accommodation	Supported Temporary Accommodation	Temporary Emergency Accommodation	Mixed	Rough sleeper

Source: CSO StatBank / Profile 5 - Homeless Persons in Ireland / E5005 / Select from table E5005

The Dublin Region Homeless Executive (DRHE) is provided by Dublin City Council as the lead statutory local authority in the response to homelessness in Dublin. DRHE reported that on 27<sup>th</sup> March 2018 there were 110 persons certified as sleeping rough on the night. Of these 14% were identified as being aged between 18-30. In 2017 1,121 families were recorded by DRHE as being homeless, with 2,235 children.

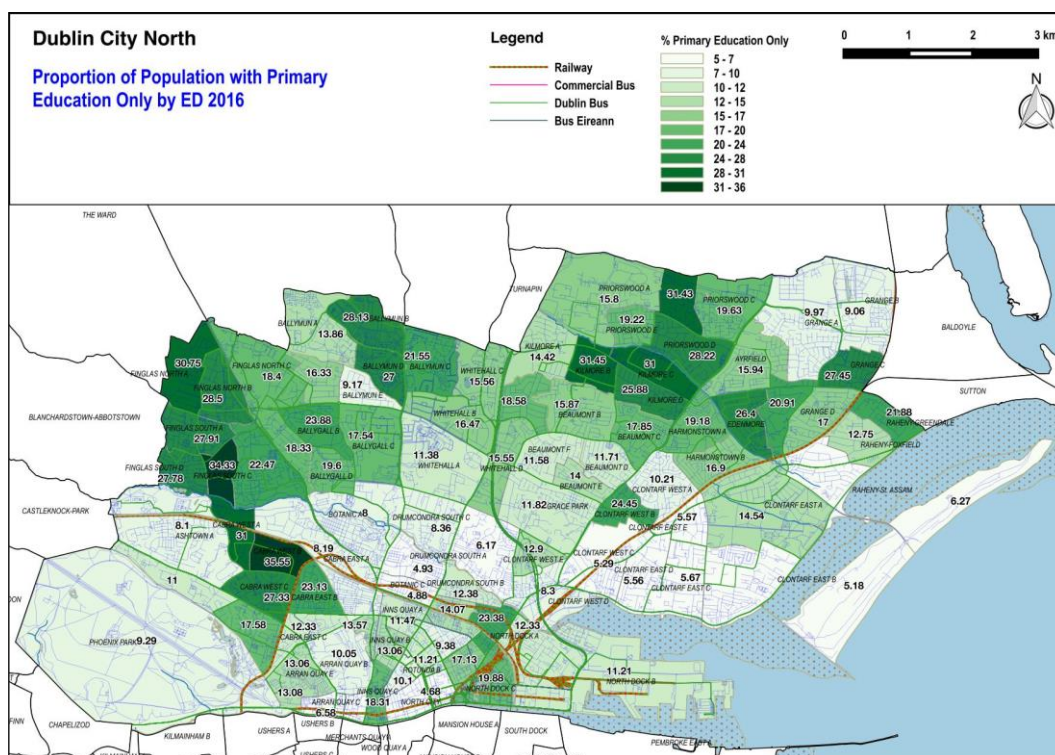

### 3.6 Educational Attainment

There has been a continuous improvement in the level of education amongst the adult population over the past 25 years throughout Ireland.

In 1991, 36.7% of the adult population had primary education only. This dropped to half that level (18.9%) in 2006 and even further to 16.0% in 2011. Between 2006 and 2011 the adult population with primary education only decreased by 2.9%age points. In 2016, 11% of the national population had primary education only.

Despite the considerable improvement generally, there are some differences with regard to the prevalence of low education between different EDs in the Dublin City North CYPSC Area.

**Map 20 – Proportion with Primary Education Only 2016**

Source: 2016 Pobal HP Deprivation Index: Haase, T. and Pratschke, J. (2017)

Considering the EDs that returned more than 30% of their population having Primary Education Only, it can be seen that there has been a relative improvement across the past three census waves.

**Table 26 - Change in Low Education Attainment 2006-2016**

Source: 2016 Pobal HP Deprivation Index: Haase, T. and Pratschke, J. (2017)

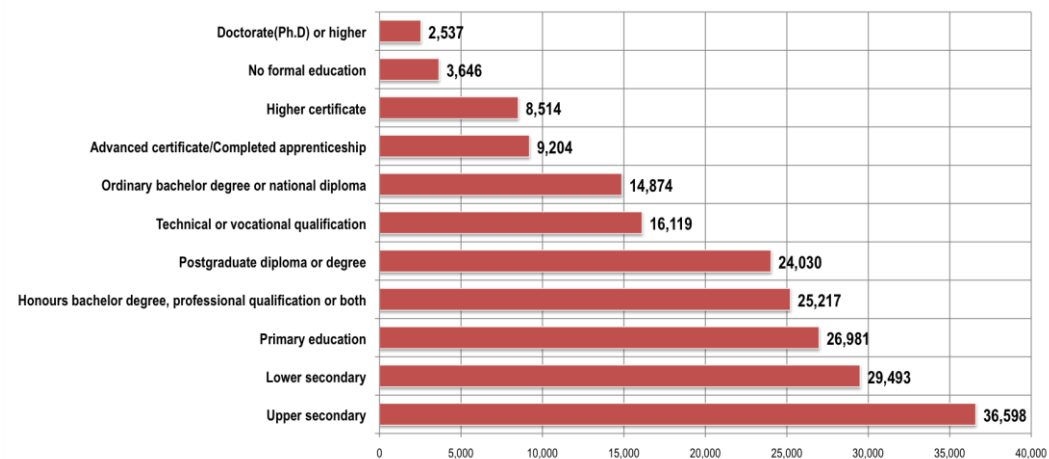

The EDs that have shown the greatest level of reduction in their respective populations with Primary Education Only over the period 2006-2016 are Priorswood B (-14.18), North Dock B (-17.07) and Ballymun A (-20.81).

### 3.6.1 Highest Level of Education Attainment

The figure below records the highest level of education attained by individuals over 15 years of age in 2016.

**Table 27 – Highest Level of Educational Attainment 2016**

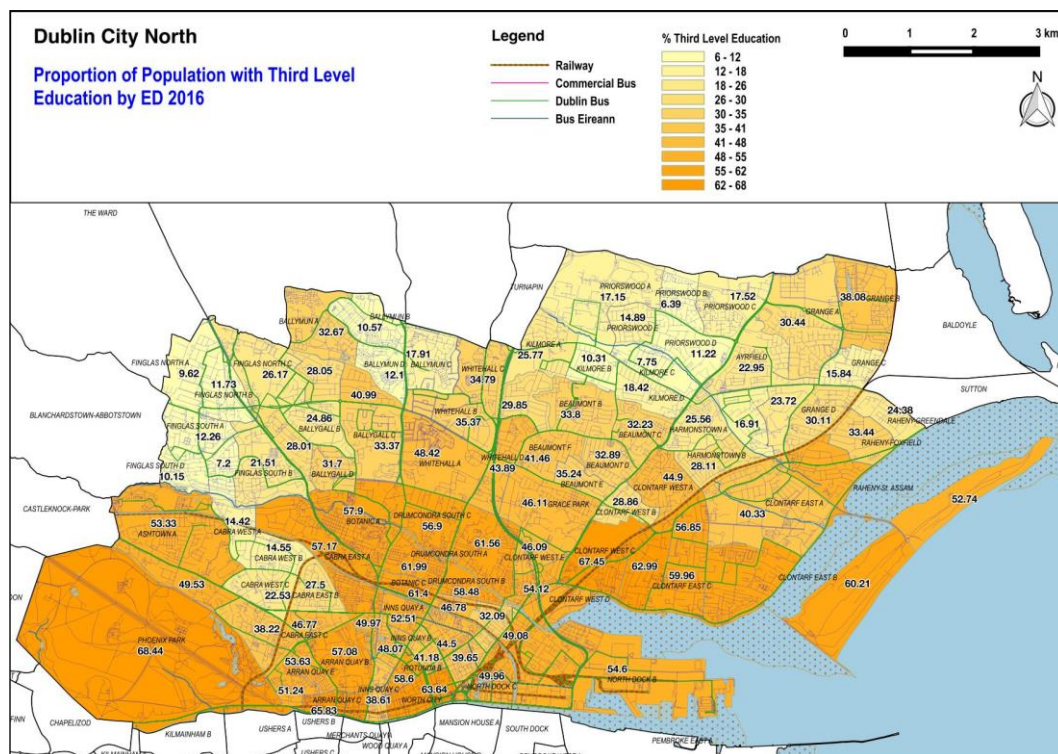

Source: CSO Census of Population 2016

22,975 Census 2016 respondents did not state the highest level of education that they had attained.

### 3.6.2 Education Attainment: Third Level Plus

Given the labour market composition and employment opportunities of the Dublin City North CYPSC Area and its environs, there are a number of EDs that returned particularly high levels of educational attainment in 2016.

**Map 21 – Proportion with Third Level Education 2016**

The figure above illustrates the rate at which the six best performing EDs increased their respective proportion of populations with third level education over the period 2006-2016.

### 3.6.3 Childcare Services

The Pobal Early Years Sector Report 2016/2017 (October 2017) records that there were 426 Early Years services provided in Dublin City, comprising of some 37% community provision and 63% private provision.

The report noted that there were 15,356 children enrolled in services, with a further 852 places vacant, representing a vacancy rate of 6%.

**Table 31 – Childcare Capacity for Children Aged 3-5 Years**

	Capacity (enrolled + vacancies)	3-5 year olds capacity (extrapolated)	3 - 5 year olds population (CSO)	% Capacity of population of 3-5 year olds

### 3.6.4 DEIS Primary Schools

Delivering Equality of Opportunity in Schools (DEIS) the Action Plan for Educational Inclusion is the Department of Education and Skills policy instrument to address educational disadvantage. The action plan focuses on addressing and prioritising the educational needs of children and young people from disadvantaged communities, from pre-school through second-level education (3 to 18 years).

DEIS provides for a standardised system for identifying levels of disadvantage and an integrated School Support Programme (SSP).

825 schools are included in the programme in the 2016/17 school year. These comprise 640 primary schools (328 urban/town schools and 312 rural primary schools) and 185 second level schools.

Primary and post-primary schools participating in DEIS receive significant additional supports and resources including additional staffing to assist them in achieving the aims of the initiative. The level of additional supports and resources allocated to schools participating in DEIS varies according to the level of disadvantage in the school community.

Where the level of disadvantage is greatest, primary schools are classified as participating in Band 1 of DEIS. The remaining participating primary schools are classified as participating in Band 2 of DEIS.

**Table 34 – DCN DEIS Primary Schools (Band 1)**

### 3.6.6 Special Needs Schools

The Department of Education and Skills (DES) provides for the education of children with special education needs through a number of support mechanisms depending on the child's assessed disability. Educational provision for children with special needs is made:

- ☐ In special schools;
- ☐ In special classes attached to ordinary schools;
- ☐ In integrated settings in mainstream classes.

**Table 37 – DCN Special Education Schools**

Special Needs	School	Address
<b>Asperger's Syndrome</b>	St. Joseph's CBS Primary	Marino Park Avenue, Dublin 3

### 3.6.7 Primary School Absenteeism Rate

Data on non-attendance in primary schools is collected by Tusla through the Annual Attendance Report. Within this report data is provided on an aggregated basis for Dublin.

**Table 38 – Dublin Primary Absenteeism Rate 2014-15**

	Mean % Student Days Lost	Mean % 20-day Absences	Mean % Expulsions	Mean % Suspensions
Dublin	6.6	15.2	0.04	1.32
Leinster	5.9	12.1	0.02	0.59
State	5.5	10.4	0.01	0.38

Source: Tusla - School Attendance Data from Primary and Post-Primary Schools 2014/15

From the above it can be seen that Dublin lost more student days at primary school level than either Leinster or the State in the academic year 2014-2015.

### 3.6.8 Post-Primary School Absenteeism Rate

Data on non-attendance in post-primary schools is collected by Tusla through the Annual Attendance Report. Within this report data is provided on an aggregated basis for Dublin.

**Table 39 – Dublin Post-Primary Absenteeism Rate 2014-15**

	Mean % Student Days Lost	Mean % 20-day Absences	Mean % Expulsions	Mean % Suspensions
Dublin	7.9	16.2	0.07	5.89
Leinster	8.0	17.1	0.06	5.26
State	8.0	17.3	0.05	5.30

Source: Tusla - School Attendance Data from Primary and Post-Primary Schools 2014/15

From the above it can be seen that Dublin lost slightly less student days at post-primary school level than either Leinster or the State in the academic year 2014-2015.

### 3.6.9 Leaving Certificate Sits

The State Examinations Commission reported in August 2017 that the national number of students sitting the Leaving Certificate examinations has increased by 0.1% from 58,465 candidates in 2016 to 58,543 in 2017.

Of the candidates who sat Leaving Certificate examinations in 2017, 55,770 candidates followed the Leaving Certificate (Established) programme, of which 14,025 (25%) followed the Leaving Certificate Vocational Programme. A further 2,773 (4.7%) candidates followed the Leaving Certificate Applied Programme.

**Table 40 - Leaving Certificate Sits 2017**

	Female	Male	Total
Dublin	6,994	7,032	14,026
State	27,886	27,845	55,731

Source: State Examinations Commission

From the above it can be seen that there were marginally more males than females sitting the Leaving Certificate in Dublin in 2017.

From the table below it can be seen that in 2017 there was 17% more males than females sitting the Leaving Certificate Applied in Dublin.

**Table 41 - Leaving Certificate Applied Sits 2017**

	Female	Male	Total
Dublin	282	394	676
State	1,247	1,526	2,773

Source: State Examinations Commission

### 3.7 Health

The CSO Census of Population 2016 provides an assessment of the general health of the population. The figure below provides the health assessment of the Dublin City North CYPSC Area population by comparison with that of the State.

**Figure 12 – General Health 2016**

Source: CSO Census of Population 2016

**Table 42 – General Health 2016**

	Total Population						Total
	Very good	Good	Fair	Bad	Very bad	Not stated	
Dublin City North	178,944	91,092	28,665	5,623	1,229	19,832	325,385

Source: CSO Census of Population 2016

At State level, the number of people with a disability increased by 47,796 between 2011 and 2016 and stood at 643,131 in April 2016, accounting for 13.5% of the population. There were 331,551 females (51.6%) and 311,580 males (48.4%) with a disability. Among those aged under 20, there was an increase of 11,828 persons (15.6%) with a disability since 2011. This represented a disability rate of 6.7% in this group (up from 6% in 2011).

The CSO reports that nationally up to one in ten persons below 45 years of age had a disability in 2016, rising to 20% by age 60. Rates increased sharply above age 70; 27.7% of females aged 70-74 had a disability while the rate had increased to 73.3% for females aged 84 and over.

Disability was more common amongst males in all age categories up to age 24, peaking in the 5-9 age groups where there were almost twice as many disabled boys (14,964) as girls (7,887).

By administrative counties, Cork City had the highest rate of disabled persons at 18.1% while the lowest rates of disability were in Fingal (10.8%), Meath (11.6%) and Monaghan (11.8%). Dublin City had a rate of disabled persons at 14.7%: the fifth highest in the State.

Educational attainment amongst disabled persons was much lower than that of the general population at all levels. Amongst those aged 15 to 50 (inclusive), 13.7% had completed no higher than primary level education, compared with 4.2% of the general population; 37.0% had completed third level education compared with 53.4% of all those aged 15-50.

There were 176,445 persons with a disability in the labour force, giving a labour force participation rate of 30.2% compared with 61.4% for the population overall. Of those with a disability aged 15 and over in April 2016 (584,045 people), just 22.3% (130,067) were at work, compared with 53.4% of the overall population in that age group. Overall in April 2016, 6.5% of those at work had a disability.

In 2016, the unemployment rate amongst persons with a disability was 26.3%, more than double the 12.9% rate for the population as a whole.

From the table below it can be seen that Dublin City had 9.1% of the population 10-14 years of age with a disability, whilst 9.9% of the population 15-19 years of age had a disability in 2016. The percentage population of both age cohorts with a disability is above that of the State, however, it is noted that many of the State services providing support for young people with disabilities are located in Dublin City.

	Dublin City			State
Dublin City	Population	Population with a Disability	Population with a Disability %	Population with a Disability %
0 - 4 years	30,683	990	3.2	3.0
5 - 9 years	27,937	1,902	6.8	6.4
10 - 14 years	24,593	2,248	9.1	8.3
15 - 19 years	28,781	2,858	9.9	9.4
20 - 24 years	44,484	3,796	8.5	9.1

The 2016 Annual Report of the Health Research Board - National Intellectual Disability Database (NIDD) Committee – provides a national record of the number of people registered on the NIDD with an intellectual disability.

### 3.7.3 Children Registered with Physical/Sensory Disability

In 2016, the Health Research Board (HRB) reported that there were 1,397 individuals registered in the CHO Area 9 registered on the National Physical and Sensory Disability Database (NPSDD) in December 2016. with a physical or sensory disability. Community Health Organisation (CHO) Area 9 includes the Dublin North, Dublin North Central and Dublin North West areas.

### 3.7.8 Carers 24 Years of Age and Under

In 2016 carers provided 6,608,515 hours of care per week, an average of 38.7 hours per carer. This was an increase of 321,005 hours (5.1%) on 2011. There were 83,754 carers (42.9%) who provided up to two hours of unpaid care a day, which made up 8.3% of the total care hours provided. There were also 16,926 carers (8.7%) who provided full-time 24 hours per seven-day week unpaid care, which represented 43% of total care hours provided.

Source: CSO StatBank / Health, Disability and Carers / E9003 / Select from table E9003

The CSO reports that in April 2016, females comprised 118,151 (60.5%) of the country's 195,263 carers, while there were 77,112 male carers.

There were 3,800 children of less than 15 years of age providing care, accounting for 1.9% of all carers in 2016.

The table below records the number of carers aged 15 years and over (2011 to 2016) that were providing regular unpaid help, and the age at which their full-time education ceased.

**Table 51 – State: Carers by Age Full-Time Education Ceased**

## 3.8 Drugs and Alcohol

### 3.8.1 National Drug Treatment Reporting System

Treatment for problem alcohol and drug use in Ireland is provided by statutory and non-statutory services, including residential centres, community-based addiction services, general practices and prison services.

For the purpose of the National Drug Treatment Reporting System (NDTRS), treatment is broadly defined as *'any activity that aims to ameliorate the psychological, medical or social state of individuals who seek help for their substance misuse problems'*. Clients who attend needle-exchange services are not included in this reporting system. From 2004 onwards, clients who report alcohol as their main problem drug have been recorded by the system. Drug treatment options include one or more of the following: medication (detoxification, methadone reduction, substitution programmes and psychiatric treatment), brief intervention, counselling, group therapy, family therapy, psychotherapy, complementary therapy, and/or life-skills training.

Compliance with the NDTRS requires that one form be completed for each new client coming for first treatment and for each previously treated client returning to treatment for problem drug use. Service providers at treatment centres throughout Ireland collect data on each individual who attends for first treatment or returns to treatment in a calendar year.

#### National Perspective

The NDTRS records cases of treated problem drug and alcohol use in Ireland between 2009 and 2015, and notes that in this seven-year period 61,439 cases were treated for problem drug use (excluding alcohol). The number of cases rose from 7,479 in 2009 to 9,892 in 2015.

- ❑ Proportion of new cases decreased from 45.9% in 2009 to 37.8% in 2015.
- ❑ Majority of cases were treated in outpatient facilities (64.4%) over the period, similar to previous years.
- ❑ Proportion of cases treated in prison decreased from 10.8% to 8.4% over the reporting period.
- ❑ In 2015 the proportion of cases treated in residential facilities increased for the first time in the period, to 18%.

The main problem drug (excluding alcohol) was recorded as follows: -

- ❑ **Opiates (mainly heroin):** most commonly reported drug. While the number of cases treated for problem opiate use remained stable over the period, the proportion of cases treated decreased from 60.6% in 2009 to 47.8% in 2015.
- ❑ **Cannabis:** 2<sup>nd</sup> most common drug among those treated. The number of cases increased by 72%, from 1,616 in 2009, to 2,786 in 2015. Cannabis is the most common drug reported by new cases.
- ❑ **Cocaine:** remained 3<sup>rd</sup> most common drug reported. In 2015, 10.4% of cases reported problem cocaine use, the highest proportion since 2010.
- ❑ Proportion of cases reporting benzodiazepines as a main problem drug increased by 185% from 306 cases (4.1%) in 2009 to 873 cases (8.8%) in 2015.
- ❑ Number of cases treated for Z-drugs has increased from 9 in 2009, to 154 in 2015.
- ❑ Reported problem use of novel psychoactive substances (NPS) peaked in 2010, at 2.5% of all cases treated, and dropped to 0.4% of all cases treated in 2012. Since then it has increased slightly to represent 0.9% of all cases treated in 2015.

#### **Polydrug Use**

- ❑ Majority of cases reported problem polydrug use (63.5%) over the period.
- ❑ Proportion reporting polydrug use has decreased from 68.4% in 2009 to 60.9% in 2015.
- ❑ Up to 2013, alcohol was the most common additional drug reported. Since 2014 benzodiazepines have become the most common additional drugs reported.

#### **Socio-Demographics**

- ❑ Median age of cases has increased from 28 years in 2009, to 30 years in 2015.
- ❑ Majority of cases, seven in every ten, reporting were male.
- ❑ Proportion who were homeless increased from 5.6% in 2009, to 9.2% in 2015.
- ❑ Proportion of Travellers treated increased marginally from 1.9% in 2009 to 2.9% in 2015.

#### **Injecting Behaviour**

- ❑ Proportion of all cases treated who reported ever injecting remained relatively stable over the reporting period at around one third of all cases.
- ❑ Proportion of new cases reporting ever injecting has decreased from 19.7% in 2009 to 14.5% in 2015.

#### **Dublin City North Incidence**

Between 2011 and 2015, there were 9,348 cases treated for problem drug use (including alcohol) who resided in the Dublin City North CYPSC area. Of these, 1,500 (16%) cases were aged less than 25 years.

**Table 53 –Problem Drug and Alcohol Case Characteristics**

DCN CYPSC Area: Gender and Age Profile	76% were male; 17% were aged 17 years or younger; Average age was 20 years, similar for both genders.
--	---

Dublin City North Children and Young People's Services Committee: **Socio-Demographic Profile**

DCN CYPSC Area: Living Conditions	70% reported living in stable accommodation; 56% lived with parents/family; 20% were in prison (received treatment in prison); 7% were homeless; 0.6% were recorded as being in foster care;
DCN CYPSC Area: Ethnicity and Nationality	2.1% reported a nationality other than Irish; 1.7% identified as Irish Traveller.
DCN CYPSC Area: Education Status	48% had completed to Junior Certificate Level; 16% had only completed Primary Level; 14% had completed to Leaving Certificate Level; 11% were still in Full Time Education; 1.6% had not completed Primary Level; 1.4% had completed a Third Level Degree.
DCN CYPSC Area: Employment Status	59% were unemployed; 11% were students; 11% were on a training course (including SOLAS/Community Employment Schemes); 11% were in receipt of disability allowance; 3.8% were in paid employment.
DCN CYPSC Area: First drug ever used	Average age at first drug use (excluding alcohol) was 14 years; First drug used: <ul style="list-style-type: none"> <li>○ 75% Cannabis;</li> <li>○ 5% Unknown;</li> <li>○ 3.5% Benzodiazepines;</li> <li>○ 3.1% MDMA;</li> <li>○ 2.7% Heroin.</li> </ul>
DCN CYPSC Area: Source of referral	34% self-referred; 14% social services; 12% family; 10% court/probation/police; 7% prison; 7% other drug treatment centre.
DCN CYPSC Area: Main Problem:	86% were treated for a drug other than Alcohol; <ul style="list-style-type: none"> <li>○ 40% Cannabis;</li> <li>○ 18% Heroin;</li> <li>○ 12% Benzodiazepines;</li> <li>○ 9% Cocaine;</li> <li>○ 2% Z Drugs.</li> </ul>
	13% ever injected, of whom; <ul style="list-style-type: none"> <li>○ 42% were currently injecting.</li> </ul>
	14% were treated for alcohol as a main problem. <ul style="list-style-type: none"> <li>○ 14 years was the average age first started to drink alcohol</li> </ul>

Source: NDTRS

In addition to the above there was an additional 29 cases of individuals aged less than 25 years who sought help as a concerned because of the drug/alcohol use of another person.

### 3.8.2 Regional and Local Drugs and Alcohol Task Forces

**Table 54 – Drugs and Alcohol Task Forces**

Drugs and Alcohol Task Force	Areas Covered

### **3.8.3 National Drug-Related Deaths Index**

The Irish National Drug-Related Deaths Index (NDRDI) is an epidemiological database that records cases of death by drug and alcohol poisoning, and deaths among drug users and those who are alcohol dependent. The Health Research Board (HRB) maintains the NDRDI. It is jointly funded by the Department of Health and the Department of Justice and Equality.

The NDRDI records data from four sources from the Central Statistics Office in order to ensure that the database is complete and accurate: -

- ❑ The Coroner Service;
- ❑ The Hospital In-Patient Enquiry scheme (HIPE);
- ❑ The Central Treatment List (CTL); *and*
- ❑ The General Mortality Register (GMR).

Cases from the different data sources are cross-matched on a selection of variables, including name, gender, county of residence, date of birth and date of death. This allows the NDRDI to eliminate duplicates and to maximise the amount of information available on each case recorded on the database. More detailed information on the methodology can be found in the previously published HRB Trends Series papers.

The NDRDI was established in September 2005 to comply with Action 67 of the 2001–2008 National Drugs Strategy. That action called for the development of a system for recording drug-related deaths and deaths among people who use drugs to enable the State and its agencies to respond in a timely manner, with accurate data.

The objectives of the NDRDI also include identifying and prioritising areas for intervention and prevention, and measuring the effects of such interventions. The remit of the NDRDI was further expanded in January 2006 to include alcohol-related deaths and deaths of people who were alcohol dependent.

The following section incorporates unpublished data from the NDRDI.

#### **Types of Cases Included in the NDRDI**

- ❑ **Poisonings:** Deaths directly due to the toxic effect of the presence in the body of a drug or drugs and/or other substance(s). Other terms used to describe such deaths include overdose, directly drug-related death and acute drug death. Deaths arising from adverse reactions to prescribed medication are not included in the NDRDI.
- ❑ **Non-poisonings:** Deaths in individuals with a history of drug dependency or non-dependent abuse of drugs (ascertained from toxicology results and from CTL, medical or coronial records), irrespective of whether the use of the drug was directly implicated in the death. This category also includes deaths among persons known to be alcohol dependent. For presentation purposes it is necessary to group these deaths into broad categories.

#### **Poisoning Deaths**

Between 2011 and 2015 there were 283 deaths due to poisonings in those who resided in the Electoral Divisions as identified by Dublin City North CYPSC. Of these deaths, 28 (10%) were among those aged less than 25 years. The NDRDI does not routinely present figures smaller than five therefore the analysis reflects that. Below is a summary of the main characteristics of these individuals.

Almost all were male, most (22, 79%) were living in stable accommodation at the time of the event, while 18% (5) were living in homeless accommodation. The median age was 22 years. Only a very small number were aged under 18 years (less than five). Most were unemployed (22, 79%) while the others were either students or in paid employment. One in five had a history of imprisonment (6, 21%) but none were in prison at the time of their death. One quarter had a history of injecting (7, 25%) but less than five were injecting at the time of their death. One in five (6, 21%) had a history of previous overdose. Over half (15, 54%) had a recorded history of mental health problems.

Almost a third (9, 32%) were alone at the time of the incident that precipitated their death – meaning that for two thirds of those who died there may have been an opportunity to prevent the death if appropriate measures had been taken. The majority of incidents took place in a private dwelling (20, 71%) followed by homeless accommodation (5, 18%). Rarely did the incident occur in a public place. Since 2012, the NDRDI has been recording the address of the incident. Of note, analysis of the geocodes of poisoning deaths shows that almost all occurred in the Electoral Divisions included in the Dublin City North CYPSC area.

Most of the poisonings involved more than one drug (24, 86%). Table 1 presents a multi-response analysis of all the drugs implicated in the deaths. For the purposes of the NDRDI, implicated means that the drug was cited as a cause of death. The multi-response analysis shows all the drugs implicated in the death. As most deaths involved more than one drug, the numbers in the table add up to more than the total. For example if a person has diazepam, methadone and Lyrica implicated in their death they will appear in the rows for diazepam, methadone and for other prescription medication.

Diazepam was the most common drug implicated (15 deaths), followed by methadone (14 deaths). Heroin was implicated in 8 deaths. Because of the multiple data sources used by the NDRDI, it is possible to report that almost all of the methadone was not prescribed, i.e. was street or diverted.

**Table 55 - Poisoning Deaths Categorised by Individual Drug**

Dublin City North: Total number of poisoning deaths 2011-2015	28
Diazepam	15
Methadone	14
Other prescription medication	11
Heroin	8
Cocaine	6
Antidepressants	5
Alcohol	5
Other Benzodiazepines	5
Other Opiates	3
MDMA	~8
Novel psychoactive substances	~
Amphetamines	~
Other	~

## Non-Poisoning Deaths

Between 2011 and 2015 there were 254 non-poisoning deaths in those who resided in the Electoral Divisions as identified by Tusla for the Dublin City North CYPSC area. Of these deaths, 16 (6%) were among those aged less than 25 years. Below is a summary of the main characteristics of these individuals:

Almost all were male, the median age was 21.5 years. Only a very small number were aged less than 18 years. Most lived in stable accommodation (69%), over half were unemployed (56%) while two out of five (38%) were in paid employment or students. History of imprisonment was not known for 75% of those non-poisoning fatalities; however a small number (less than five) did have a history of imprisonment. History of injecting was not known for this group however none were injecting at or around the time they died. Half (50%) had a history of mental health problems.

Half (50%) were alone at the time of the incident, half (50%) of the incidents occurred in a public place. A small number (less than five) were in hospital at the time of their death. Most incidents took place within the Electoral Division Boundaries identified as Dublin City North CYPSC area.

<sup>8</sup> The NDRDI does not routinely present figures smaller than five, therefore, the analysis reflects that (~).

A small number (less than five) had been previously treated for problem drug use. In addition, less than five non-poisoning fatalities also were known to be alcohol dependent.

Almost all the deaths were due to traumatic causes. The most common cause was hanging (44%), followed by road traffic collisions and drowning.

The most common drugs misused were cocaine, cannabis and benzodiazepines by this group. Only very small number (less than five) had a recorded problem with heroin.

### **3.9 Security**

Dublin City North CYPSC area is covered by the following Dublin Metropolitan Regions: -

- Northern Dublin Metropolitan Region;
- North Central Dublin Metropolitan Region; *and*
- Western Dublin Metropolitan Region.

#### **3.9.1 Domestic Violence**

Domestic violence is defined as the use of physical or emotional force or threat of physical force in a close adult relationship.

A barring order is a court order which requires the violent person to leave the family home and can last up to three years. In order to obtain a barring order, the person must attend a District Court hearing of the area of their own residence.

Between 2011 and 2012, a steep increase was recorded at both the State level and in the Dublin region in the number of applications granted for domestic violence barring orders. The rate in the Dublin region increased from 62.1 per 10,000 families in 2011 to 78.3 in 2012. Since 2012, the rate has remained relatively stable at both the Dublin regional and State levels.

#### **3.9.2 Garda Youth Diversion Projects (GYDPs)**

The Garda Youth Diversion scheme, operated by the Garda Youth Diversion Office, provides that in certain situations a young person (aged less than 18 years) who accepts accountability for a crime can be cautioned and supervised as an alternative to prosecution. The number of youths referred to the scheme is recorded by the An Garda Síochána Pulse Database and is published on an annual basis by the Irish Youth Justice Service (IYJS) by Garda Division.

There are 12 GYDPs based within the DNC CYPSC Area: -

- Hay: Unit 3, St. Josephs, Summerhill, Dublin 1, which is run by Foróige.
- Most: 34 Dominick Place, Dublin 1, which is run by Brádog Youth Service.
- Nickol: 41 Lower Buckingham Street, Dublin 1, which is run by Belvedere Youth.
- Swan: St Agatha's Hall, Dunne St., Dublin 1, which is run by Swan Youth Service.
- Keep: Recreation Centre, Cromcastle Road, Kilmore West, Dublin 5, which is run by Kilmore West Youth Project
- Donnycarney: Donnycarney Community and Youth Centre, Collins Avenue East, Donnycarney, Dublin 5, which is run by Donnycarney Youth Project.
- North Bay: St. Monica's Youth Centre, Tonlegee Rd, Dublin 5, which is run by Extern.
- BYB: The Lighthouse, Sillogue Road, Ballymun, Dublin 11, which is run by Crosscare.
- Woodale: Sphere 17 Regional Youth Service, Darndale, Dublin 17, which is run by Sphere 17.
- Cabra Step Up: Room 13, Cabra Parkside Community and Sports Centre, Ratoath Road, Cabra, Dublin 7, which is run by Cabra for Youth.
- Effort: The Den Youth Centre, Finglas Youth Service, St. Helena's Road, Finglas South, Dublin 11, which is run by Crosscare.

- Fán: The Den Youth Centre, Finglas Youth Service, St. Helena's Road, Finglas South, Dublin 11, which is run by Crosscare.

## 4 CFSN Areas

DCN CYPSC area comprises of seven Child and Family Support Network (CFSN) Areas: Ballymun/Whitehall, Finglas, Cabra, North East Inner City, North West Inner City, Dublin City Bay, and Dublin City North. The following sections consider each of the seven areas in the context of the key BOBF goals.

In 2016 the total population for the Dublin City North CYPSC area was 325,385.

**Map 23 – DCN CYPSC CFSN Areas 2016**

## 4.1.8 Population Density Summary

**Figure 18 – CFSN Population Density Summary 2016**

Source: CSO Census of Population 2016: Persons per Sq. Km.

From the above it can be seen that in 2016 the population density across the DCN CYPSC area was 4,380 persons per sq. km. By comparison, the population density of the State increased to 70

persons per sq. km. in 2016, up from 67 persons in 2011 and 62 persons per sq. km. recorded in 2006.

In 2016 the average population density in urban areas was 2,008 persons per sq. km. compared to 27 persons per sq. km. in rural areas.

The most densely populated CFSN area in 2016 was the North West Inner City. This had a density of 9,065 per sq. km., representing over twice the density in the DCN CYPSC area.

## 4.2 Population By SAPS

The three most densely populated EDs in the State were recorded in 2016 in the Dublin City North CYPSC Area: -

- ❑ Rotunda A: 23,860.4 Population Density (persons per sq km);
- ❑ Mountjoy A: 18,014.7 Population Density (persons per sq km); *and*
- ❑ Mountjoy B: 17,963.5 Population Density (persons per sq km).

All of these EDs are located in the North East Inner City ED.

## 4.2.2 SAP Social Class Composition

The changes in social class composition experienced throughout Ireland over the past years largely parallel those in educational achievement, with a gradual increase in the number of professionals and an even greater decline in the proportion of semi- and unskilled manual workers.

In 2016, 14 SAPs returned more than 14% of their respective populations as being unskilled.

**Table 71 – Highest Percentage of Unskilled Workers by SAP**

### 4.2.3 SAP Unemployment

In the fourth quarter of 2015, the unemployment rate for Dublin City stood at 7.6%, its lowest rate in six years, having peaked in 2012 at 13%. However, the youth unemployment rate has remained persistently high at 15%.

Unemployment is not evenly distributed across the Dublin City North CYPSC Area, with 27 EDs recording a male unemployment as between 5.5% and 10%, and 26 Dublin City North CYPSC Area EDs reporting a male unemployment rate of between 15% and 38% in 2016. Female unemployment rate was recorded between 4.3% and 10% in 42 Dublin City North CYPSC Area EDs, with 29 reporting a female unemployment rate of between 15% and 33% in 2016.

Within these EDs, the following SAPs recorded particularly high levels of unemployment in 2016.

**Table 72 – Male Unemployment Rate >40 by SAP**

Small Area ID	With ED	With CFSN Area	Unemployment rate- Male 2006	Unemployment rate- Male 2011	Unemployment rate- Male 2016

## 4.2.4 SAP Housing

There was a 1.9% decrease in the proportion of local authority housing in Ireland from 9.8% in 1991 to 7.9% in 2011. The proportion in the Dublin Region declined by 4.8% from 14.1% to 9.3%, marking a significant reduction in the provision of social housing in the Region. Dublin City saw an even greater decline (17.2% to 11.8%) in the proportion of local authority housing, albeit from a base which, in 1991, was the third highest amongst any local authority area throughout the country.

In 2016 at ED level, the highest proportion of local authority rented accommodation was to be found in Ballymun D (63.2%), Ballymun B (57.8%), Priorswood C (46.0%), Priorswood B (44.0%) and Ballymun C (41.4%).

#### 4.2.5 SAP Deprivation

There is a significant degree of variation across the Dublin City North CYPSC Area, characterising the area as harbouring extremes with regard to both affluence and deprivation.

Of the 93 EDs in the Dublin City North CYPSC Area, 13 EDs classify as being '*affluent*' (Clontarf East C, Clontarf West D, North City, Clontarf East E, North Dock B, Arran Quay C, Botanic B, Clontarf East B, Drumcondra South C, Clontarf East D, Botanic C, Drumcondra South A, and Clontarf West C). No EDs classify as being '*very affluent*', whilst 15 EDs fall into the category of being '*disadvantaged*' and two as being '*very disadvantaged*' (Priorswood B and Finglas South C). The remainder are classified as being either '*marginally above average*' (36 EDs), or '*marginally below average*' (29 EDs).

Of the total number of SAPs, 4 are classified as being '*extremely disadvantaged*', 64 are '*very disadvantaged*', and 188 are '*disadvantaged*'. A total of 629 SAPs are classified as being either '*marginally above average*' or '*marginally below average*', whilst 318 are '*affluent*', with a further 55 being either '*very affluent*' or '*extremely affluent*'.

## 5 Ballymun Whitehall CFSN Area

The CFSN area of Ballymun/Whitehall covers an area of 6.84 sq. km. and encompasses nine electoral divisions. Of the 33,200 inhabitants of the Ballymun/Whitehall CFSN area, 7,615 (22.94%) were under the age of 18 in 2016. The Ballymun/Whitehall population of Under 18s accounted for 2.34% of all inhabitants (325,385) in the DCN CYPSC area in 2016.

**Figure 19 – Ballymun Whitehall Pop'n by Age Band 2016**

Source: CSO Census of Population 2016

The area had a considerably higher proportion of its population of 20-24 years of age (28%) than was the case in the State (17%), and had lower proportions of all other age cohorts below age 14.

In 2016 there were 2,702 one-parent families with children (33.74%) in the Ballymun/Whitehall CFSN area. The total number of families in the area was 8,009.

In 2016, the unemployment rate for men was lower than the comparative national figure. 11.07% of males in the Ballymun/Whitehall CFSN area were unemployed compared to the national figure of 16.5%. 8.13% of females were unemployed compared to the national figure of 5.6%.

### 5.1 Key Profile Indicators

In 2016, the Small Area of Population 268157011 within the ED of Whitehall A had a deprivation score of -39.25. It was the only SAP area classified as *Extremely Disadvantaged*.

The population within this SAP area comprised of 71 individuals, all of whom were over 55 years of age, with no persons under 24 years of age.

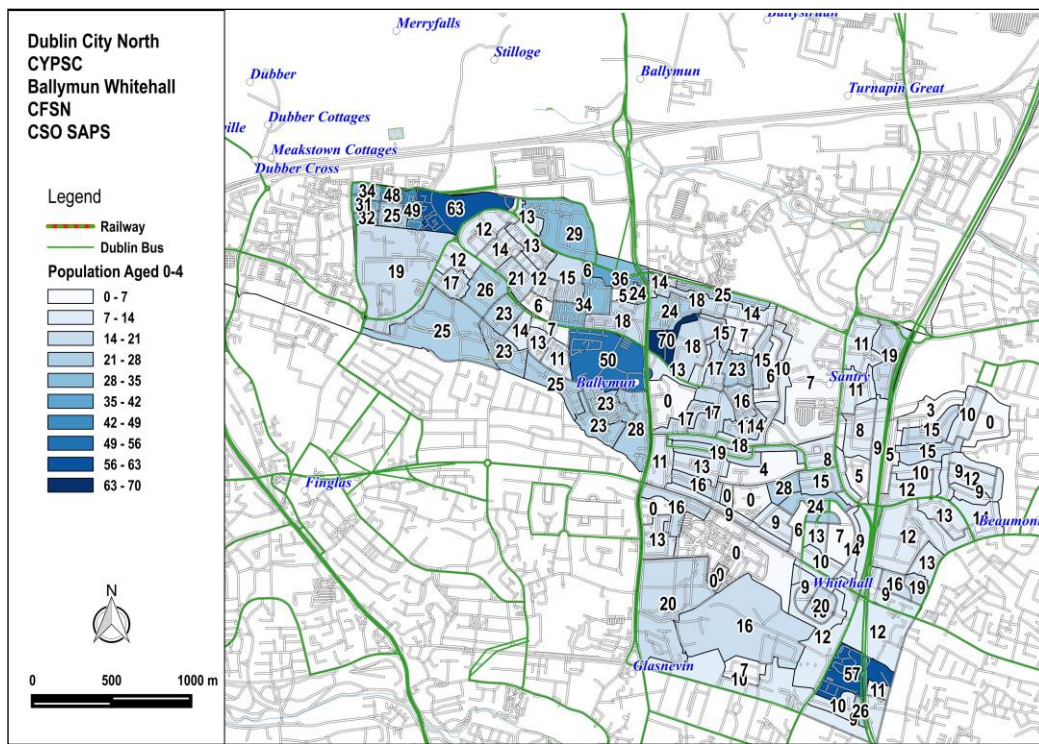

In 2016 there were twenty Small Areas of Population that were classified as *Very Disadvantaged*. These were located within the EDs of Ballymun A, B, C, and D. 2,314 young people were living within the *Very Disadvantaged* SAP areas, comprising of: -

- ❑ 327 individuals aged 0-4;
- ❑ 711 individuals aged 5-12;
- ❑ 655 individuals aged 13-18;
- ❑ 621 individuals aged 19-24.

In 2016 there were sixteen Small Areas of Population that was classified as *Disadvantaged*. These were distributed within the EDs of Ballymun A, B, C and D, and Beaumont A. 1,914 young people aged 0-24 were living within the *Disadvantaged* SAP areas.

## 6 Finglas CFSN Area

Of the 37,296 inhabitants of the Finglas CFSN area, 9,084 (24.36%) were under the age of 18 in 2016. The Finglas CFSN area population of under 18s accounted for 2.79% of all inhabitants (325,385) in the DCN CYPSC area in 2016.

**Figure 20 – Finglas Population by Age Band 2016**

Source: CSO Census of Population 2016

The area had a higher proportion of its population of 20-24 years of age (28%) than was the case in the State (17%), and had lower proportions of all other age cohorts below age 14.

In 2016 there were 2,992 one-parent families with children (41.59%) in the Finglas CFSN area. The total number of families in the area was 7,194.

In 2016, the unemployment rate for men was lower than the comparative national figure. 11.59% of males in the Finglas CFSN area were unemployed compared to the national figure of 16.5%. 7.56% of females were unemployed compared to the national figure of 5.6%.

### 6.1 Key Profile Indicators

In 2016, there were no Small Areas of Population that were classified as *Extremely Disadvantaged*.

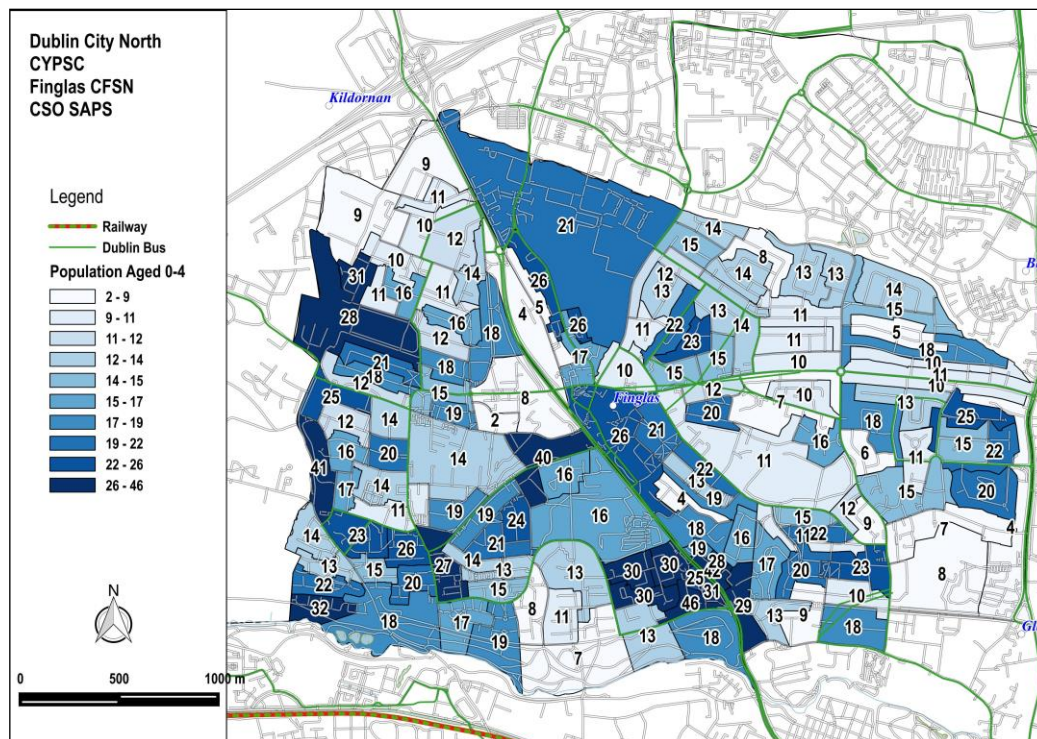

In 2016 there were fifteen Small Areas of Population that was classified as *Very Disadvantaged*. These were all within the EDs of Finglas North A and B, and Finglas South B, C and D. 1,803 young people aged 0-24 were living within the *Very Disadvantaged* SAP area, comprising of: -

- ❑ 300 individuals aged 0-4;
- ❑ 634 individuals aged 5-12;
- ❑ 503 individuals aged 13-18;
- ❑ 366 individuals aged 19-24.

In 2016 there were fifty-four Small Areas of Population that was classified as *Disadvantaged*. 4,996 young people aged 0-24 were living within the *Disadvantaged* SAP areas.

## 7 Cabra CFSN Area

Of the 38,068 inhabitants of the Cabra CFSN area, 7,138 (18.75%) were under the age of 18 in 2016. The Cabra CFSN area population of under 18s accounted for 2.19% of all inhabitants (325,385) in the DCN CYPSC area in 2016.

**Figure 21 – Cabra Population by Age Band 2016**

Source: CSO Census of Population 2016

The area had a higher proportion of its population of 20-24 years of age (26%) than was the case in the State (17%), and also a higher proportion of those aged 0-4.

In 2016 there were 1,940 one-parent families with children (32.74%) in the Cabra CFSN area. The total number of families in the area was 5,925.

In 2016, the unemployment rate for men was lower than the comparative national figure. 8.98% of males in the Cabra CFSN area were unemployed compared to the national figure of 16.5%. 5.79% of females were unemployed compared to the national figure of 5.6%.

### 7.1 Key Profile Indicators

In 2016, the Small Area of Population 268034009 within the ED of Cabra West B had a deprivation score of -31.64. It was the only SAP area classified as *Extremely Disadvantaged*. The population within this SAP area comprised of 106 individuals; three of these were in the age cohort 19-24.

In 2016 there was one Small Area of Population that was classified as *Very Disadvantaged*. Small Area of Population 268033004 within the ED of Cabra West A had a deprivation score of -20.62. 67 young people aged 0-24 were living within the *Very Disadvantaged* SAP area, comprising of: -

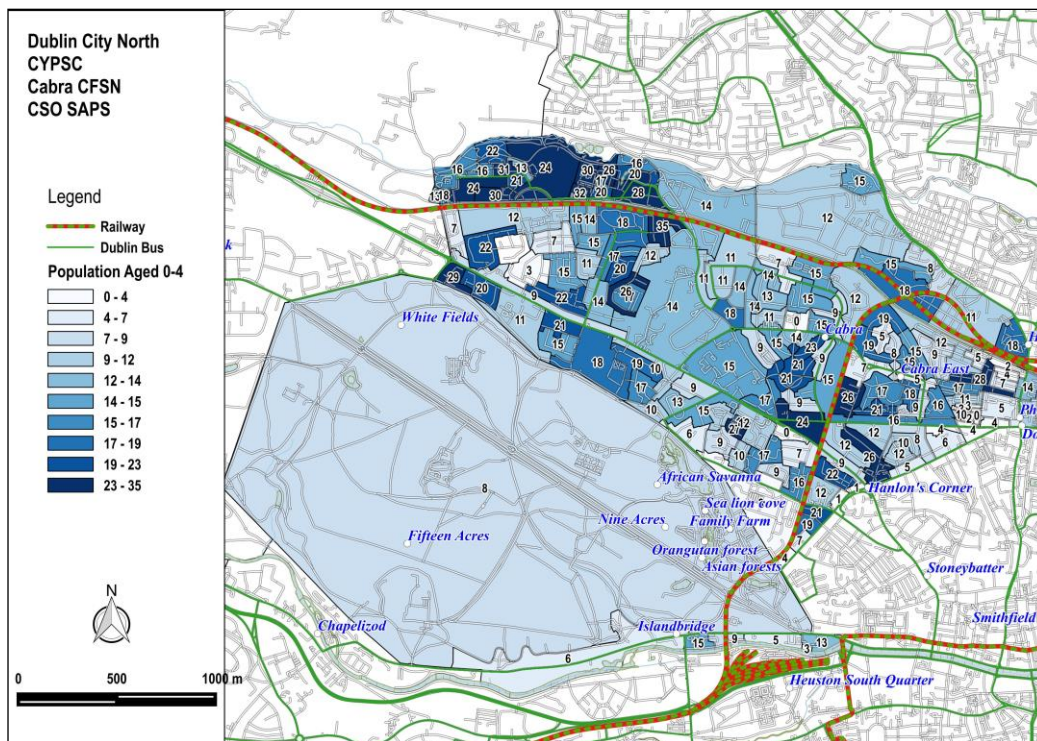

- ❑ 11 individuals aged 0-4;
- ❑ 21 individuals aged 5-12;
- ❑ 14 individuals aged 13-18;
- ❑ 24 individuals aged 19-24.

In 2016 there were twenty-one Small Areas of Population that was classified as *Disadvantaged*. These were distributed within the EDs of Cabra West A, B, C and D, Ashtown A, and Phoenix Park. 1,418 young people aged 0-24 were living within the *Disadvantaged* SAP areas.

## 8 North East Inner City CFSN Area

Of the 51,704 inhabitants of the North East Inner City CFSN area, 6,935 (13.41%) were under the age of 18 in 2016. The North East Inner City CFSN area population of under 18s accounted for 2.13% of all inhabitants (325,385) in the DCN CYPSC area in 2016.

**Figure 22 – North East Inner City Pop'n by Age Band 2016**

Source: CSO Census of Population 2016

The area had a much higher proportion of its population of 20-24 years of age (43%) than was the case in the State (17%), with proportionately lower proportions of all other age cohorts.

In 2016 there were 2,292 one-parent families with children (49.70%) in the North East Inner City CFSN area. The total number of families in the area was 4,908.

In 2016, the unemployment rate for men was lower than the comparative national figure. 10.58% of males in the North East Inner City CFSN area were unemployed compared to the national figure of 16.5%. However, 8.22% of females were unemployed compared to the national figure of 5.6%.

### 8.1 Key Profile Indicators

In 2016 there was one Small Area of Population 268081014 within ED Inns Quay B that had a deprivation score of -30.49, and was classified as *Extremely Disadvantaged*. 50 young people aged 0-24 were living within the *Extremely Disadvantaged* SAP area, comprising of: -

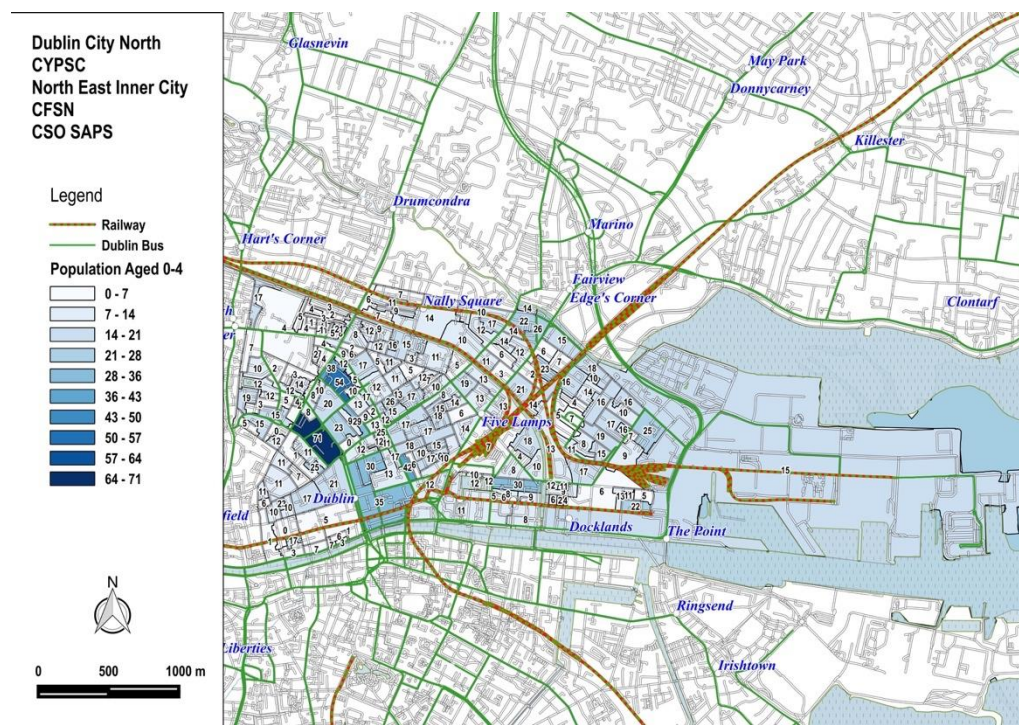

- ❑ 12 individuals aged 0-4;
- ❑ 18 individuals aged 5-12;
- ❑ 11 individuals aged 13-18;
- ❑ 9 individuals aged 19-24.

In 2016 there were fifteen Small Areas of Population that was classified as *Very Disadvantaged*. These were all within the EDs of Ballybough A, Mountjoy A, Mountjoy B, North Dock C and Rotunda A. A total of 912 young people aged 0-24 were living within the *Very Disadvantaged* SAP areas.

In 2016 there were sixteen Small Areas of Population that was classified as *Disadvantaged*. A total of 1,226 young people aged 0-24 were living within the *Disadvantaged* SAP areas.

## 9 North West Inner City CFSN Area

Of the 19,581 inhabitants of the North West Inner City CFSN area, 3,313 (16.91%) were under the age of 18 in 2016. The North West Inner City CFSN area population of under 18s accounted for 1.02% of all inhabitants (325,385) in the DCN CYPSC area in 2016.

**Figure 23 – North West Inner City Pop'n by Age Band 2016**

Source: CSO Census of Population 2016

The area had a higher proportion of its population of 20-24 years of age (42%) than was the case in the State (17%).

In 2016 there were 856 one-parent families with children (45.97%) in the North West Inner City CFSN area. The total number of families in the area was 1,862.

In 2016, the unemployment rate for men was lower than the comparative national figure. 10.01% of males in the North West Inner City CFSN area were unemployed compared to the national figure of 16.5%. However, 7.26% of females were unemployed compared to the national figure of 5.6%.

### 9.1 Key Profile Indicators

In 2016 there were no Small Areas of Population in the North West Inner City CFSN area that were classified as *Extremely Disadvantaged*.

There were three Small Areas of Population that were classified as *Very Disadvantaged*. These were contained within the EDs of Arran Quay D and Inns Quay C. 215 young people aged 0-24 were living within the *Very Disadvantaged* SAP area, comprising of: -

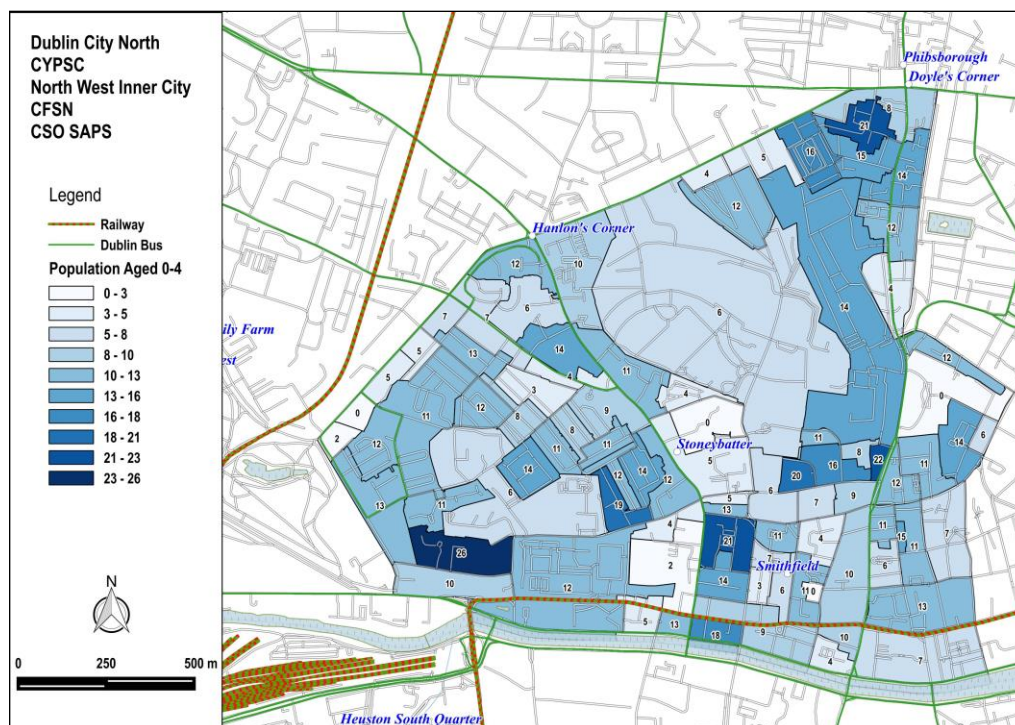

- ❑ 29 individuals aged 0-4;
- ❑ 60 individuals aged 5-12;
- ❑ 61 individuals aged 13-18;
- ❑ 65 individuals aged 19-24.

In 2016 there were five Small Areas of Population that was classified as *Disadvantaged*. These were all within the EDs of Arran Quay B, Arran Quay C, Arran Quay E and Inns Quay C. A total of 450 young people aged 0-24 were living within the *Disadvantaged* SAP areas.

# 11 Dublin North East CFSN Area

Of the 87,117 inhabitants of the Dublin North East CFSN area, 21,521 (24.7%) were under the age of 18 in 2016. The Dublin North East CFSN area population of under 18s accounted for 6.6% of all inhabitants (325,385) in the DCN CYPSC area in 2016.

**Figure 25 – Dublin City North Pop'n by Age Band 2016**

Source: CSO Census of Population 2016

The area had a slightly higher proportion of its population of 20-24 years of age (19%) than was the case in the State (17%).

In 2016 there were 5,994 one-parent families with children (35.15%) in the Dublin North East CFSN area. The total number of families in the area was 17,049.

In 2016, the unemployment rate for men was lower than the comparative national figure. 9.04% of males in the Dublin North East CFSN area were unemployed compared to the national figure of 16.5%. However, 6.11% of females were unemployed compared to the national figure of 5.6%.

## 11.1 Key Profile Indicators

In 2016 Small Area of Population 268119005, contained in the Priorswood C ED in the Dublin North East CFSN area was classified as *Extremely Disadvantaged* with a score of -36.01.

There were fifteen Small Areas of Population that were classified as *Very Disadvantaged*. These were contained within the EDs of Grange E, Kilmore B, Kilmore C, Priorswood B, Priorswood C and Priorswood D. 2,142 young people aged 0-24 were living within the *Very Disadvantaged* SAP area, comprising of: -

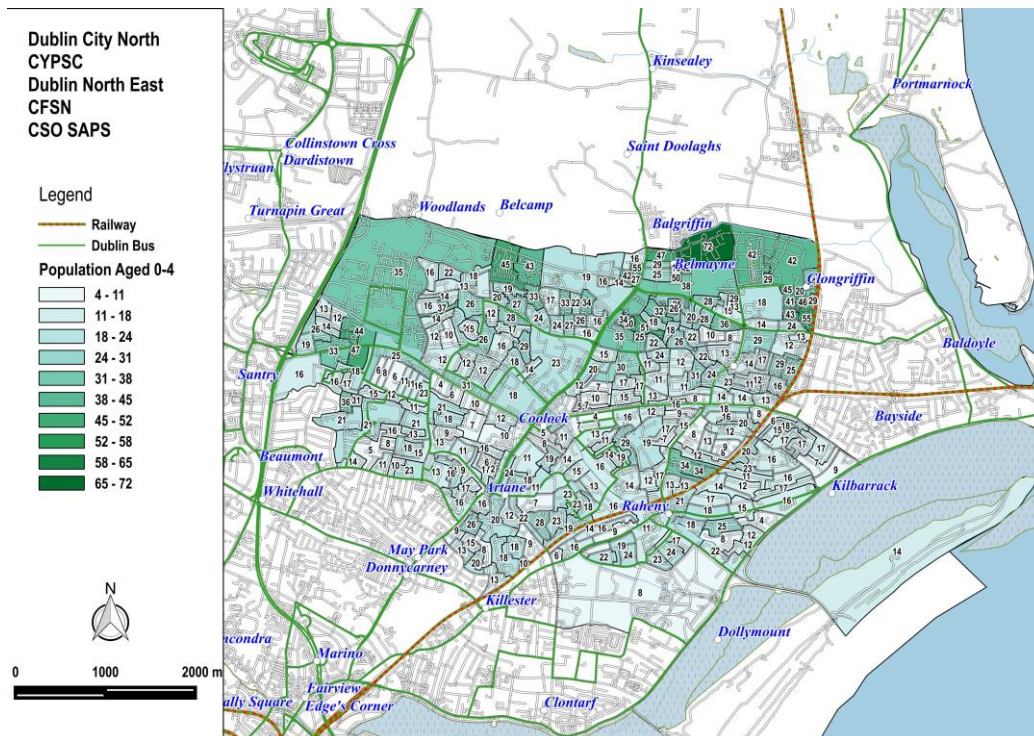

- ❑ 373 individuals aged 0-4;
- ❑ 652 individuals aged 5-12;
- ❑ 586 individuals aged 13-18;
- ❑ 531 individuals aged 19-24.

In 2016 there were sixty-four Small Areas of Population that was classified as *Disadvantaged*. These were all within the EDs of Ayrfield, Beaumont B and C, Edenmore, Grange A, C and E, Harmonstown B, Kilmore A, B, C and D, Priorswood B, C, D E, Raheny-Foxfield and Raheny-Greendale. A total of 6,204 young people aged 0-24 were living within the *Disadvantaged* SAP areas.

## A3 Relative Index Score

**Table 78 - Labelling of Relative Index Scores**

Relative Index Score	Label
Over 30	Extremely Affluent
20 to 30	Very Affluent
10 to 20	Affluent
0 to 10	Marginally Above Average
0 to -10	Marginally Below Average
-10 to -20	Disadvantaged
-20 to -30	Very Disadvantaged
Below -30	Extremely Disadvantaged

## **A4 Socio-Demographic Profile Construction**

The demographic information contained in this profile has been largely extracted from the 2016 Census of Population. The following definitions are used within the Census 2016 Data Structure. In particular, the profile references the Small Areas of Population that comprise the DCN CYPSC Area as these provide a greater level of detail than that available at ED level.

### **A4.1 Electoral Divisions**

The Electoral Divisions (EDs) are the smallest legally defined administrative areas in the State.

### **A4.2 Small Areas**

Small Areas are areas of population generally comprising between 80 and 120 dwellings created by The National Institute of Regional and Spatial Analysis (NIRSA) on behalf of the Ordnance Survey Ireland (OSi) in consultation with CSO.

Small Areas were designed as the lowest level of geography for the compilation of statistics in line with data protection and generally comprise either complete or part of townlands or neighbourhoods. There is a constraint on Small Areas that they must nest within Electoral Division boundaries.

Small areas were used as the basis for the Enumeration in Census 2016. Enumerators were assigned a number of adjacent Small Areas constituting around 400 dwellings in which they had to visit every dwelling and deliver and collect a completed census form and record the dwelling status of unoccupied dwellings.

The small area boundaries have been amended in line with population data from Census 2016.

### **A4.3 Municipal Districts**

There are 95 municipal districts covering the entire area of each county (apart from Dublin, Cork and Galway cities).

### **A4.4 2014 Local Electoral Areas**

Each county, city and city and county is divided into local electoral areas and members of local authorities are elected in these. Local electoral areas and the number of members to be elected in each are specified in a statutory instrument for each local authority area. These were most recently made in 2014 for all except Cork City, which was made in 2008. In general, LEAs are formed by aggregating Electoral Divisions. However, in a number of cases Electoral Divisions are divided between LEAs to facilitate electors.

### **A4.5 Settlements (Census towns, cities and suburbs)**

In Census 2016, a new Census town was defined as there being a minimum of 50 occupied dwellings, with a maximum distance between any dwelling and the building closest to it, of 100 metres, and where there was evidence of an urban centre (shop, school etc). The proximity criteria for extending existing 2006 Census town boundaries was also amended to include all occupied dwellings within 100 metres of an existing building. Other information based on OSi mapping and orthogonal photography was also taken into account when extending boundaries. Boundary extensions were generally made to include the land parcel on which a dwelling was built or using other physical features such as roads, paths etc.

Census towns, which previously combined legal towns and their environs, have been newly defined using the standard census town criteria (with the 100 metres proximity rule). For some towns the impact of this has been to lose area and population, compared with previous computations.

26 new census towns were created for the 2016 Census.
